Journey Energy Inc. ("Journey" or "the Company"), is a publicly traded company engaged in the exploration, development and production of crude oil and natural gas in the province of Alberta, Canada. Journey also develops and operates power generation assets. Journey's shares trade on the Toronto Stock Exchange in Canada and the OTCQX exchange in the U.S. These condensed consolidated interim financial statements present the results of operations for the Journey group of entities.

The registered address for Journey is 4300, 888 3rd Street SW Calgary, Alberta, Canada and the corporate head office is located at 1800, 215 -9th Avenue SW, Calgary, Alberta, Canada.

1. BASIS OF PRESENTATION

a) Statement of compliance

These condensed consolidated interim financial statements as at September 30, 2026 (the "Financial Statements") are unaudited and have been prepared in accordance with IFRS Accounting Standards ("**IFRS**") as issued by the International Accounting Standards Board ("**IASB**"), applicable to the preparation of interim financial statements, including IAS 34 Interim Financial Reporting. Certain disclosures included in the notes to the annual financial statements have been condensed in the following interim note disclosures or have been disclosed on an annual basis only. Accordingly, these Financial Statements should be read in conjunction with the audited consolidated annual financial statements for the year ended December 31, 2025 (the "**2025 Annual Financial Statements**"). These financial statements have been prepared using material accounting policies consistent with those in the 2025 Annual Financial Statements, except as noted below. There were no new accounting standards or amendments to existing standards adopted in the nine months ended September 30, 2026 that have a material impact on Journey's Financial Statements. The Company's Board of Directors approved these Financial Statements on November 9, 2026.

b) Basis of measurement

Unless otherwise indicated, all references to dollar amounts in these Financial Statements and related notes are in thousands of Canadian dollars ("**$**"), which is the functional and presentation currency of the Company and its subsidiaries.

The Financial Statements have been prepared on a historical cost basis, except for certain financial instruments which are recorded at fair value as detailed in the accounting policies disclosed in note 14 of these Financial Statements.

c) Significant estimates and judgements

The timely preparation of the Financial Statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amount of assets, liabilities, income and expenses. Actual results may differ materially from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are reviewed and for any future years affected. Significant judgements, estimates and assumptions made by management in these Financial Statements are consistent with those outlined in note 4 of the 2025 Annual Financial Statements.

d) Comparative information

Certain prior period comparatives have been represented to confirm with current year's presentation.

Carry amounts	Petroleum and natural gas assets	Right of use assets	Power assets	Other assets	Total
January 1, 2025	427,080	570	36,891	80	464,621
December 31, 2025	403,966	269	53,044	136	457,415
September 30, 2026	**397,718**	**1,905**	**66,807**	**143**	**466,573**

Future development costs for oil and natural gas reserves of $461,052 (December 31, 2025 - $461,052) were included in the depletion calculation. Included in power assets at September 30, 2026 are $66,807 (December 31, 2025 - $47,802) of costs related to projects under development that are not currently being depreciated as they have not been placed into operation yet.

During the periods ended September 30, 2025 and September 30, 2026 the Company completed several minor dispositions. The assets disposed during the period ended September 30, 2025 had a property, plant & equipment net book value of $9,355, exploration and evaluation net book value of $502, with an associated decommissioning liability of $9,956. Net proceeds on sale, after closing adjustments amount to $6,539 which resulted in a gain on sale of assets of $6,638. The assets disposed during the three months ended September 30, 2026 had a property, plant & equipment net book value of $28,202, exploration and evaluation net book value of $107, with an associated decommissioning liability of $17,732. Net proceeds on sales, after closing adjustments amount to $28,000 which resulted in an aggregate gain of $17,423. For the nine month period ended September 30, 2026 the Company disposed of property, plant & equipment with a net book value of $39,131, exploration and evaluation net book value of $170, with an associated decommissioning liability of $28,657. Net proceeds on sales, after closing adjustments amounts to $35,225 and resulted in an aggregate gain of $24,581.

During the period ended September 30, 2026, the Company acquired property, plant & equipment of $7,895 whose value was concentrated mainly in a working interest on strategic infrastructure assets. Including nominal working capital adjustments, total proceeds were approximately $8,000.

At September 30, 2026, management determined that there were no indicators of impairment or impairment reversal and testing for impairment or impairment reversal was not required.

3. EXPLORATION AND EVALUATION ASSETS

Balance, January 1, 2025	4,758
Additions	629
Acquisitions	929
Dispositions (Note 2)	(502)
Lease expiries (i)	(150)
Balance, December 31, 2025	5,664
Additions	110
Acquisitions	3,771
Dispositions (Note 2)	(170)
Balance, September 30, 2026	**9,375**

(i) Amounts recognized as exploration and evaluation expense.

At September 30, 2026 management determined that there were no indicators of impairment or impairment reversal for the exploration and evaluation assets.

4. BANK CREDIT FACILITIES

	Operating Bank Facility (Debt Issuance)	Delayed Draw Term
Amounts drawn	-	7,000
Unamortized financing costs	(219)	(848)
Carrying value	(219)	6,152
Current	(219)	6,152
Long-term	-	-

Effective March 17, 2025, Journey entered into a credit agreement with a Canadian chartered bank. The credit agreement was comprised of three separate facilities with a $55 million borrowing base. On May 29, 2026, the credit agreement was renewed with a $45.8 million borrowing base consisting of the following:

This first facility is a $15.0 million revolving operating line of credit (the “Operating Facility”) for general corporate and working capital purposes. The maturity date of the Operating Facility is May 31, 2028.

The second facility is a $12.4 million term facility (“Term Facility”). The Term Facility was a single drawdown on March 17, 2025. The funds were used to repay the Company’s previously existing term debt balance of $12.4 million. Mandatory repayments of the Term Facility of $3,000 were required each fiscal quarter with the initial payment made on October 1, 2025. On May 29, 2026, the commitment amount of this credit facility was amended to $3.2 million to reflect the repayments of $9.2 million. On June 30, 2026, the remainder owing under the Term Facility was repaid and the borrowing base reduced by the same amount. This component is no longer available for credit withdrawal.

The third facility is a $27.6 million delayed draw term facility (“Delayed Draw Facility”). Proceeds from the Delayed Draw Facility may be drawn to fund the Company’s Duvernay joint venture capital requirements. Journey is permitted a maximum of five drawdowns. Any amounts repaid or prepaid may not be re-borrowed. The final advance date on the Delayed Draw Facility is the earlier of the day of the fifth draw down or the date on which the facility has been fully advanced. Mandatory

repayments of the Delayed Draw Facility of $3,000 commence on the last banking day of each fiscal quarter commencing with the first full fiscal quarter ending March 31, 2027. The maturity date of the Delayed Draw Facility is the earlier of two years from the final advance date of the facility or March 17, 2028. As of September 30, 2026, there has been one draw on this facility for $7.0 million, which occurred in May of 2026.

As of September 30, 2026, the Company has $35.6 million available credit to borrow.

Until the repayment dates of the Term Facility and the Delayed Draw Facility, mandatory repayments are required on these facilities in an amount equal to 75% of excess cash flow for each fiscal quarter commencing with the fiscal quarter ending December 31, 2025. Excess cash flow is defined as consolidated earnings before interest, taxes, depreciation and amortization ("**EBITDA**") for the period less: capital and decommissioning expenditures, cash lease payments, cash taxes, aggregate interest expense, mandatory or voluntary repayments of any term facility and any cash extraordinary or non-recurring losses.

Interest on all drawn amounts under the facilities is payable monthly at a rate determined based on a pricing grid starting with either Canadian Prime, U.S. Base, Canadian Overnight Repo Rate Average ("CORRA"), and Secured Overnight Financing Rate ("SOFR"), plus a range of 2% to 7% depending on the type of facility, the base rate, and the Company's consolidated net debt to EBITDA ratio.

All credit facilities may be extended annually subject to lender approval, with a 364 day term-out period if not renewed. The credit facilities are subject to a semi-annual borrowing base review and redetermination in May and November. The credit facilities have the following financial covenants:

i) Consolidated net debt to EBITDA ratio as at the end of each fiscal quarter commencing with the full fiscal quarter following the closing date will not be greater than 2.00:1.00.
ii) Fixed charge coverage ratio at the end of each fiscal quarter will not be less than 2.00:1.00.

Covenant ratio	Threshold	Compliance
Net debt to EBITDA[2, 3]	Not greater than 2.00:1.00	Met
Fixed charge coverage[4]	Not less than 2.00:1.00	Met

(1) The covenants do not have standardized meanings under IFRS Accounting Standards and are calculated in accordance with the definitions in the credit agreements, as described further below.
(2) The net debt used in the covenant calculation primarily includes bank debt, convertible debentures, other borrowings and the working capital deficit, if any. Net debt excludes derivative financial instrument assets and liabilities which are not due and owing at the calculation date and the lease liabilities.
(3) EBITDA is defined as net income, plus or minus as required: tax expense; cash interest expense to the extent deducted in determining net income; depletion, depreciation and other amortization charges; mark-to market gains and losses on financial instruments; share based compensation; and gains and losses on dispositions. The definition of EBITDA is on a 12-month trailing basis, subject to adjustment for certain acquisitions or dispositions in excess of a threshold amount to give effect to the transaction as if it occurred at the beginning of the calculation period, among other potential adjustments.
(4) The fixed charge coverage ratio is calculated as the ratio of trailing twelve months EBITDA over the trailing twelve months scheduled principal repayments of debt and interest.

There are also non-financial covenants that are generally related to good operating and financial practices that are standard in the industry. At September 30, 2026 Journey is in compliance with all financial and non-financial covenants under the credit agreement.

5. OTHER LOANS

As part of the Canadian federal and provincial government's COVID assistance plans, Journey obtained partially forgivable, emissions reduction based, interest free loans. The September 30, 2026 amount outstanding was $375.

The table below summarizes the activity for other loans:

	$
Balance at January 1, 2025	417
Government loan	(42)
Balance at December 31, 2025 and September 30, 2026	**375**
Expected to be paid within one year	375
Expected to be paid beyond one year	-

6. CONVERTIBLE DEBENTURES

	Number of Convertible Debentures	Liability Component ($)	Equity Component ($)
Balance at January 1, 2025	38,000	34,782	1,736
Accretion	-	614	-
Balance at December 31, 2025	38,000	35,396	1,736
Accretion	-	506	-
Balance at September 30, 2026	**38,000**	**35,902**	**1,736**

On March 20, 2024, the Company issued $38.0 million principal amount of Senior Convertible Unsecured Subordinated Debentures (the "Debentures") at a price of $1,000 per debenture. Due to the conversion feature into common shares, the Debentures have both a liability and an equity component. The liability component was calculated by discounting the future cash flows (interest and principal) at an interest rate comparable to similar debt instrument but without a conversion option. The value of the equity component was the residual calculation assuming the share option value is equal to the difference between the total issue proceeds and liability component.

The Debentures will mature and be repayable on March 31, 2029. The Debentures bear interest at the rate of 10.25 percent per annum payable semi-annually in arrears on March 31 and September 30 of each year. At the holder's option, the Debentures are convertible into Common Shares at any time prior to the close of business on the earlier of the business day immediately preceding (i) the maturity date, or (ii) if called for redemption, the date fixed for redemption by the Corporation, iii) if called for repurchase in the event of a change of control, the payment date, at a conversion price of $5.00 per share, subject to adjustment in certain events. This represents a conversion rate of approximately 200 Common Shares for each $1,000 principal amount of the Debentures.

Holders converting their Debentures will receive, in addition to the applicable number of Common Shares, accrued and unpaid interest from the date of the last interest payment date up to the date of conversion. Also, in the event of a change of control of the Corporation, holders of the Debentures will be entitled to convert them into Common Shares at the stipulated conversion price. In addition to the number of Common Shares they would otherwise be entitled to receive on conversion and depending on when and the price at which the acquisition of control occurs at, the holders may be entitled to an additional number of Common Shares according to the make-whole provisions contained in the indenture agreement.

The Debentures are direct, unsecured obligations of the Company, subordinated to all existing and future senior indebtedness of the Company. The Debentures will rank *pari passu* with one another and with such other series of Debentures issued under the indenture or other indentures supplemental to this indenture to the extent subordinated on the same terms.

The Debentures may not be redeemed by the Company prior to March 31, 2027. On or after March 31, 2027 and prior to March 31, 2029, the Debentures are redeemable by the Company, in whole or in part from time to time on not more than 60 days and not less than 30 days prior notice at a redemption price equal to their principal amount plus accrued and unpaid interest thereon up to (but excluding) the redemption date, provided that the current market price at the time of the redemption notice is at least 125 percent of the conversion Price.

7. DECOMMISSIONING OBLIGATIONS

The Company's decommissioning obligations result from the net ownership interests in petroleum and natural gas assets, which includes well sites, pipelines, processing facilities, oil batteries, and power generation. The Company estimates the total undiscounted, un-escalated amount of cash flows required to settle its decommissioning obligations at September 30, 2026 to be $167,284 (December 31, 2025 - $216,321) the majority of which will be incurred at various times between 2026 and 2059. The present value of the future liability at September 30, 2026 has been calculated using an inflation rate of 2.3% (December 31, 2025 – 2.0%) for the costs and the discounted using the risk-free rate of 4.3% (December 31, 2025 – 3.9%). Changes to decommissioning obligations during the respective periods below were as follows:

	September 30, 2026	December 31, 2025
Balance, beginning of period	**138,369**	163,026
Obligations acquired	**201**	112
Obligations disposed	**(28,657)**	(17,383)
Obligations settled	**(4,211)**	(7,717)
Net development activity	**360**	153
Revisions to estimates	**1,859**	11,798
Changes in discount rates	**(5,334)**	(17,009)
Accretion	**3,857**	5,389
Balance, end of period	**106,444**	138,369
Current provision	**8,244**	8,244
Non-current provision	**98,200**	130,125

8. LEASE OBLIGATIONS

The present value of Journey's lease obligations was as follows at the respective period ends:

	Total
Balance, January 1, 2025	1,194
Additions	144
Lease payments	(806)
Accretion	89
Balance, December 31, 2025	621
Additions	1,985
Lease payments	(605)
Accretion	66
Balance, September 30, 2026	**2,067**
Expected to be settled within one year	504
Expected to be settled beyond one year	1,563

The Company used an interest rate that approximated its incremental cost of borrowing at the inception of each lease to discount the future lease liabilities. The undiscounted lease liability at September 30, 2026 was $2,486 (December 31, 2025 - $647).

9. SHARE CAPITAL

The outstanding common shares of the Company at each respective period end are as follows:

	Common Shares (#)	Share Capital ($)
Balance, January 1, 2025	67,107	367,989
Issued on vesting of long-term incentives	374	3,191
Balance, December 31, 2025 and September 30, 2026	**67,481**	**371,180**

10. SHARE BASED COMPENSATION

The Company uses a combination of share-based, long-term incentives as part of its compensation plans for employees and directors. These share-based incentives are Restricted Share Units ("RSU's"); Peer Performance Share Units ("PPSU's"); and Share Price Performance Share Units ("SPSU's").

The following RSU's, PPSU's and SPSU's were outstanding at the end of the respective periods:

	RSU's	PPSU's	SPSU's
Balance at January 1, 2025	1,334	575	575
Granted	613	265	265
Settled	(414)	(147)	(147)
Forfeited	(59)	(20)	(20)
Balance at December 31, 2025	1,474	673	673
Forfeited	(19)	(6)	(6)
Balance at September 30, 2026	**1,455**	**667**	**667**

Share based compensation expense for the three and nine months ended September 30, 2026 was $805 and $2,366 respectively, while comparatively for the three and nine months ended September 30, 2025 the expense was $837 and $2,241 respectively.

11. FINANCE EXPENSE

Finance expense is comprised of the following:

	Three months ended September 30,		Nine months ended September 30,	
	2026	2025	**2026**	2025
Interest and bank fees	**1,195**	1,545	**3,949**	4,437
Accretion of decommissioning obligations	**1,255**	1,393	**3,857**	4,024
Accretion of lease obligations	**42**	8	**66**	69
Accretion of term and bank debt	**263**	474	**969**	1,006
Accretion of convertible debentures	**172**	147	**506**	438
Total finance expense	**2,927**	3,567	**9,347**	9,974

12. DEFERRED INCOME TAX

Differences between the statutory and effective income tax rates for the three and nine month periods ended September 30, 2026 and 2025 are accounted for as follows:

	Three months ended September 30,		Nine months ended September 30,	
	2026	2025	**2026**	2025
Net income before income tax	**21,793**	5,491	**38,176**	21,015
Statutory income tax rate	**23.0%**	23.0%	**23.0%**	23.0%
Expected income tax expense	**5,012**	1,263	**8,780**	4,833
Increase (decrease) resulting from:				
Share based compensation	**(50)**	(211)	**(100)**	(50)
Other	**(2)**	-	**3**	-
Deferred income tax expense	**4,960**	1,052	**8,683**	4,783

13. PER SHARE AMOUNTS

The following table summarizes the weighted average common shares used in calculating income per share:

	Three months ended September 30,		Nine months ended September 30,	
	2026	2025	**2026**	2025
Net income	**16,833**	4,439	**29,493**	16,232
Weighted average shares - basic	**67,481**	67,106	**67,481**	67,106
Weighted average shares - diluted	**69,812**	68,425	**69,674**	67,586
Net income per share – basic	**$0.25**	$0.07	**$0.44**	$0.24
Net income per share – diluted	**$0.24**	$0.06	**$0.42**	$0.24

The net income per basic share is calculated by dividing net income by the weighted average number of common shares outstanding during the respective periods. For the three and nine month period ended September 30, 2026 the dilutive impact of RSU's, PPSU's, SPSU's and convertible debentures was an additional 2,331 and 2,193 respectively to the weighted average common shares. For the three and nine month period ended September 30, 2025 the dilutive impact of RSU's, PPSU's, and SPSU's was an additional 1,319 and 480 respectively to the weighted average common shares.

The impact of the issuance of the convertible debentures for the three and nine month periods ending September 30, 2025, had an anti-dilute effect and were therefore excluded from the calculation of diluted shares.

14. FINANCIAL INSTRUMENTS

(a) Risks

(i) Commodity price risk

Due to the volatility of commodity prices, the Company is exposed to adverse consequences in the event of declining prices. The Company entered financial derivate petroleum and natural gas contracts in order to partially protect its cash flow on future sales as part of a covenant in the credit facility agreement. These contracts reduce the fluctuation in sales prices by locking in prices with respect to future deliveries of petroleum and natural gas on the contracted volumes.

As at September 30, 2026, the Company had the following financial derivative contracts in place:

Term	Option traded	Daily Volume	Price	Reference	Fair Value
Oct 1, 2026 to Dec 31, 2026	Crude Oil Collar	750 bbl	$72.5-$98 CAD	WTI Nymex	(1,891)
Oct 1, 2026 to Dec 31, 2026	Crude Oil Swap	500 bbl	$67.57 USD	WTI Nymex	(1,323)
Oct 1, 2026 to Dec 31, 2026	Crude Oil Swap	500 bbl	$90 USD	WTI Nymex	131
Oct 1, 2026 to Mar 31, 2027	Crude Oil Collar	300 bbl	$61.55-$75 USD	WTI Nymex	(976)
Oct 1, 2026 to Mar 31, 2027	Natural Gas Swap	10,000 GJ	$2.90 CAD	NGX AB-NIT 7A	1,584
Oct 1, 2026 to Dec 31, 2027	Crude Oil Put	1,500 bbl	$60 USD	WTI Nymex	(1,683)
Nov 1, 2026 to Mar 31, 2027	Natural Gas Swap	5,000 GJ	$3.50 CAD	NGX AB-NIT 7A	1,018
Jan 1, 2027 to Mar 31, 2027	Crude Oil Swap	500 bbl	$80 USD	WTI Nymex	(213)
Jan 1, 2027 to Dec 31, 2027	Crude Oil Collar	500 bbl	$65-$89 USD	WTI Nymex	(409)
Total financial derivative contract liability					**(3,761)**

The loss on derivative contracts for the respective periods ended were as follows:

	Three months ended September 30,		Nine months ended September 30,	
	2026	2025	**2026**	2025
Unrealized gain (loss) on derivative contracts	**(6,992)**	(1,243)	**(4,779)**	31
Realized gain (loss) on derivative contracts	**(3,797)**	1,037	**(11,776)**	903
Total gain (loss)	**(10,789)**	(206)	**(16,555)**	934

(ii) Credit risk

A substantial portion of Journey's accounts receivable is with petroleum marketing entities. Receivables from these marketers are normally collected on the 25th day following the calendar month in which production has occurred. Journey has not experienced any material collection issues with its petroleum and natural gas marketers. Journey generally extends unsecured credit to these companies; therefore, the collection of accounts receivable may be affected by changes in economic or other conditions and may accordingly impact Journey's overall credit risk. Management believes the risk is mitigated by the size, reputation and diversified nature of the companies to which it extends credit.

Journey is exposed to losses in the event of non-performance by counterparties to financial risk management contracts. Journey minimizes credit risk associated with possible non-performance of these financial instruments by entering contracts with only investment grade counterparties, limiting exposure to any one counterparty and monitoring procedures around extending credit. Journey is managing this risk within its credit limit guidelines and procedures. While Management believes Journey's credit limit guidelines and procedures are sufficient to address credit risk, they are still subject to the volatility of the general financial credit environment. Journey's credit risk primarily relates to:

	September 30, 2026	December 31, 2025
Accounts receivable	**23,601**	24,639

At September 30, 2026, Journey estimated its provision for uncollectable accounts to be $1,047 (December 31, 2025 - $857). Accounts receivable balances outstanding greater than ninety days at September 30, 2025 were $1,970 (December 31, 2025 – $2,822).

(iii) Interest rate risk

The Company's convertible debentures bear interest at a fixed rate. The Company's credit facility loans bear interest depending on the Company's Consolidated Net Debt to EBITDA ratio and as well varies depending on the current Canadian Prime, U.S. Base, CORRA, and SOFR rates.

(iv) Foreign exchange risk

The Company is exposed to the risk of changes in the Canadian/U.S. dollar exchange rate on sales of commodities that are directly correlated to U.S. dollar benchmark prices.

(v) Liquidity risk

Journey is exposed to liquidity risk, which is the risk the entity may not be able to generate or obtain sufficient cash resources to meet its commitments as they become due. Journey works to mitigate this risk by management of cash and debt. Journey maintains short-term and long-term cash forecasting based on estimated production levels and estimated pricing in order to proactively enact changes to our capital spending.

On May 29, 2026 the Company's credit facility agreement was renewed and at September 30, 2026 the Company has a $15 million revolving credit facility and $20.6 million available to borrow on its delayed term debt facility (Note 4). The Company continues to make progress in reducing its overall net debt position primarily using the cash generated from operations. Commodity prices and the general economic environment continue to be volatile, increasing the risk that cash flow from operations could decline, which could result in Journey being unable to fund upcoming debt maturities. Journey is dependent on current commodity pricing to enable it to generate cash flow necessary to fund debt principal repayments and interest as they fall due. Journey also commenced a hedging program to secure minimum realized sales prices, which in turn will assist with debt repayments.

The following table details Journey's financial liabilities and other contractual obligations as at September 30, 2026:

	Total	**< 1 year**	**1-3 years**	**4-5 years**
Accounts payable and accrued liabilities	**44,665**	44,665	-	**-**
Delayed draw term debt	**6,152**	6,152	-	**-**
Interest on term debt	**270**	270	-	**-**
Other loans	**375**	375	-	**-**
Financial derivative liabilities	**3,761**	3,564	197	-
Convertible debentures	**35,902**	-	35,902	-
Interest on convertible debentures	**9,743**	3,895	5,848	-
Natural gas transportation	**1,486**	845	440	201
Leases, including non-lease components	**2,558**	713	1,353	492
Total	**104,912**	60,479	43,740	693

15. SUPPLEMENTAL INFORMATION

a) *Changes in non-cash working capital*

	Three months ended September 30,		Nine months ended September 30,	
Sources (uses) of funds	**2026**	2025	**2026**	2025
Accounts receivable	**(439)**	2,062	**1,038**	7,763
Prepaid expenses and deposits	**1,068**	(33)	**(90)**	(9,508)
Accounts payable and accrued liabilities	**934**	(10,468)	**13,146**	(9,603)
	1,563	(8,439)	**14,094**	(11,348)
Related to:				
Operating activities (i)	**(6,551)**	(4,593)	**(1,869)**	(12,915)
Investing activities	**8,114**	(3,846)	**15,963**	1,567
	1,563	(8,439)	**14,094**	(11,348)

(i) Excluded from the changes in operating non-cash working capital on the statement of cash flows is $193 for the nine months ended September 30, 2026, and $145 and $312 for the three and nine months ended September 30, 2025 respectively in relation to prepaid amortization of deferred financing charges. These expenses have been included in the non-cash financing charges of the operating activities in the statement of cash flows.

b) *Supplementary cash flow information*

	Three months ended September 30,		Nine months ended September 30,	
	2026	2025	**2026**	2025
Interest paid	**2,188**	2,483	**4,932**	5,137

c) *Petroleum and natural gas sales by product type*

	Three months ended September 30,		Nine months ended September 30,	
	2026	2025	**2026**	2025
Crude oil	**50,665**	42,870	**143,929**	120,450
Natural gas[1]	**2,203**	3,341	**10,605**	13,293
Natural gas liquids	**4,785**	5,343	**14,294**	15,039
Petroleum and natural gas sales	**57,653**	51,554	**168,828**	148,782

1. During 2026, Journey held certain fixed-price physical natural gas delivery contracts as part of its commodity price risk management strategy. Revenue recognized from these physical gas contracts is included with the natural gas sales line item. The fixed pricing provided under these contracts results in revenue that may differ from prevailing market prices at the time of delivery.

16. COMMITMENTS

The Company has committed to firm-service contracts for transporting natural gas as well as payments under various operating leases. The amounts in the table below are the minimum cash obligations that the Company must pay under the terms of the contracts.

	Total	<1 year	1-3 years	4-5 years
Natural gas transportation	**1,486**	845	440	201
Leases, including non-lease components	**2,558**	713	1,353	492
Total	**4,044**	1,558	1,793	693

In addition to the commitments listed above, the Company has various indemnifications in place in the ordinary course of business, none of which, as assessed by management, are expected to have a significant impact on the Company's consolidated financial statements.

17. RELATED PARTY TRANSACTIONS

The Company considers its directors and executives to be key management personnel. As at September 30, 2026 there were thirteen (September 30, 2025 – twelve) individuals that were considered key management personnel. Compensation for these individuals for the three and nine month periods ended September 30 was comprised of the following:

	Three months ended September 30,		Nine months ended September 30,	
	2026	2025	**2026**	2025
Salaries and fees	**521**	497	**2,536**	2,173
Short-term employee benefits	**36**	47	**120**	142
Share based payments[1]	**444**	385	**1,317**	1,145
Total	**1,001**	929	**3,973**	3,460

1. These amounts represent the amortization of share-based compensation associated with the Company's share-based compensation plans.

The related party transactions above were recorded at the above disclosed exchange amounts. Management believes the amount agreed upon between the parties is reflective of comparable fair market value transactions.

18. SEGMENTED INFORMATION

The Company's operations are organized into two distinct reportable segments based on the nature of their products, activities, and the regulatory environments in which they operate.

i) Petroleum & Natural Gas: This segment focuses on the exploration, development, and production of crude oil and natural gas assets. It encompasses the full lifecycle of upstream oil and gas activities. As this represents the Company's core business, it aggregates all corporate and administrative functions, as these activities are primarily dedicated to supporting the upstream operations and are not separately allocated to the Power Generation segment.

ii) Power Generation: This segment involves the production and sale of electricity to the Alberta Electric grid and is intended to not only diversify Journey's revenue streams but also provide a natural hedge against its power consumption at different operating locations. During the nine months ended September 30, 2026 this segment's assets became greater than 10% of Journey's total assets. Therefore, segmented information has been disclosed in accordance with IFRS 8.

	Petroleum and Natural Gas		**Power Generation**		**Total**	
Three months ended September 30,	**2026**	2025	**2026**	2025	**2026**	2025
Petroleum and natural gas sales	**57,653**	51,554	**-**	-	**57,653**	51,554
Processing and other income	**1,700**	1,546	**125**	228	**1,825**	1,774
Royalites	**(9,096)**	(8,453)	**-**	-	**(9,096)**	(8,453)
Realized and unrealized gain on financial derivatives	**(10,789)**	(206)	**-**	-	**(10,789)**	(206)
Net revenue	**39,468**	44,441	**125**	228	**39,593**	44,669
Operating costs	**17,150**	19,926	**121**	142	**17,271**	20,068
Depletion and depreciation	**10,277**	12,167	**-**	88	**10,277**	12,255
All other expenses excluding income tax	**(9,748)**	6,855	**-**	-	**(9,748)**	6,855
Net income (loss) before income tax	**21,789**	5,493	**4**	(2)	**21,793**	5,491

Net income (loss) before income tax	**38,298**	21,091	**(122)**	(76)	**38,176**	21,015
Deferred income tax expense (recovery)	**8,711**	4,801	**(28)**	(18)	**8,683**	4,783
Net income (loss)	**29,587,**	16,290	**(94)**	(58)	**29,493**	16,232

19. CAPITAL MANAGEMENT

Journey manages its capital structure with the goal of maintaining flexibility to respond to changing economic conditions, commodity prices, and the risk profiles of its assets. Journey has the ability to adjust its capital structure through various means, including issuing new shares and debt, repurchasing shares or debt, or changing capital expenditures relative to adjusted funds flow. Journey has established a long-term net debt target of less than 1.0 times adjusted funds flow, annualized for the current quarter. While the actual ratio may fluctuate on a quarterly basis due to factors such as facility outages, commodity price changes, capital expenditures, and the timing of acquisitions and dispositions, Journey monitors these variables to manage its capital structure. As of September 30, 2026, Journey's net debt was 0.5 times its annualized third quarter 2026 adjusted funds flow. This ratio represents a proxy for the number of years it would take to pay off the net debt if no additional capital expenditures were made and adjusted funds flow remained consistent.

Management views the capital structure as working capital (current assets less current liabilities, but excluding the fair value of other liability, derivative contracts and decommissioning liabilities), share capital, term-debt, convertible debentures and other loans. The Company's key objectives when managing its capital structure are to: 1) meet its financial obligations as they come due; 2) to ensure sufficient financial flexibility to achieve its continuing business objectives including the replacement of production, funding future growth opportunities, expanding its developing power business, and the pursuit of accretive acquisitions; and 3) repay its borrowings at their maturity dates (or renegotiate existing debt agreements upon acceptable commercial terms). To accomplish this Management strives to optimize its cost of capital while at the same time managing its leverage. To manage its capital structure Journey may issue equity, term-debt, convertible debentures, adjust discretionary capital spending, use its credit facilities, or dispose of non-core assets.

The Company's primary source of funds is the cash provided from operating activities. Management believes the Company is well positioned to execute on its future strategic growth plans, including funding debt payments as they come due. Future exploration and development capital expenditures are expected to be mainly funded through cash generated from operating activities.

Journey continually monitors its capital structure and adjusts it throughout the year as a result of general economic conditions, the state of the petroleum industry and global events, all of which may affect commodity prices. Journey prepares an annual capital budget, which is approved by the Board of Directors, and is updated quarterly for acquisition and divestiture activity as needed, changes in commodity prices, and drilling successes. Given the volatile commodity price environment, which is impacted significantly by both domestic and world events outside the control of the Company, the budget is intended to be flexible and is re-evaluated at each regularly scheduled board meeting. Journey's approach ensures its capital structure aligns with both short-

term operational needs and long-term strategic goals, balancing liquidity with flexibility to support growth opportunities while maintaining financial strength.

Adjusted funds flow

Journey considers adjusted funds flow to be a key measure that provides a more comprehensive view of the company's ability to generate cash flow necessary for financing capital expenditures, meet its decommissioning obligations, and fulfilling its financial commitments. Adjusted funds flow is calculated by adjusting cash flow from operating activities to exclude changes in non-cash working capital and decommissioning obligation expenditures. Management believes these elements are subject to timing variations in collection, payment, and occurrence. By excluding them, management is able to provide a more meaningful performance measure of Journey's ongoing operations. Specifically, expenditures on asset retirement obligations may fluctuate depending on the company's capital programs and the maturity of its operating areas.

The settlement of decommissioning obligations is managed through Journey's capital budgeting process, which incorporates the available adjusted funds flow. A reconciliation of adjusted funds flow is presented in the following table:

	Three months ended September 30,	
	2026	2025
Cash flow provided by operating activities	**15,934**	12,778
Add (deduct):		
Changes in non-cash working capital	**6,551**	4,738
Transaction costs	**153**	-
Decommissioning costs incurred	**1,691**	2,938
Adjusted Funds Flow[1]	**24,329**	20,454

Net debt

Net debt is used by management to provide a more comprehensive understanding of Journey's capital structure and to assess the Company's liquidity. Journey calculates net debt by considering cash, accounts receivable, prepaid expenses, accounts payable and accrued liabilities, short and long-term debt (the Credit Facility), senior unsecured notes, convertible debentures and other liabilities. Management uses total market capitalization and the ratio of net debt to annualized adjusted funds flow for the current quarter to analyze balance sheet strength and liquidity. Following is a summary of total market capitalization, net debt, annualized current quarter adjusted funds flow, and net debt to annualized current quarter adjusted funds flow:

	September 30, 2026	December 31, 2025
Principal amount of term and delayed draw term debt	**7,000**	9,160
Principal amount of bank debt	**-**	6,375
Principal amount of convertible debentures	**38,000**	38,000
Accounts payable and accrued liabilities	**44,665**	31,519
Other loans	**375**	375
Deduct:		
Cash in bank	**(9,265)**	(1,541)
Accounts receivable	**(23,601)**	(24,639)
Prepaid expenses	**(8,781)**	(8,691)
Net debt[1]	**48,393**	50,558
Annualized current quarter adjusted funds flow	**97,316**	60,068
Net debt to annualized current quarter adjusted funds flow	**0.5**	0.8

1) Adjusted Funds Flow and Net debt as presented does not have any standardized meaning prescribed by IFRS Accounting Standards and therefore it may not be comparable with the calculation of similar measures of other entities. Management considers net debt to be a capital management measure.
