## INDEPENDENT AUDITORS' REPORT

To the Shareholders of Journey Energy Inc.

### ***Opinion***

We have audited the consolidated financial statements of Journey Energy Inc. (the Entity), which comprise:

- the consolidated statement of financial position as at December 31, 2018
- the consolidated statement of comprehensive loss for the year then ended
- the consolidated statement of changes in equity for the year then ended
- the consolidated statement of cash flows for the year then ended
- and notes to the consolidated financial statements, including a summary of significant accounting policies

(Hereinafter referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the consolidated financial position of the Entity as at December 31, 2018, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRS").

### ***Basis for Opinion***

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the "***Auditors' Responsibilities for the Audit of the Financial Statements***" section of our auditors' report.

We are independent of the Entity in accordance with the ethical requirements that relevant to our audit of the financial statements in Canada and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

***Other Matter - Comparative Information***

The consolidated financial statements for the year ended December 31, 2017 were audited by another auditor who expressed an unmodified opinion on those financial statements on March 13, 2018.

***Other Information***

Management is responsible for the other information. Other information comprises the information included in Management's Discussion and Analysis filed with the relevant Canadian Securities Commissions.

Our opinion on the financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit and remain alert for indications that the other information appears to be materially misstated.

We obtained the information included in Management's Discussion and Analysis filed with the relevant Canadian Securities Commissions as at the date of this auditors' report. If, based on the work we have performed on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact in the auditors' report.

We have nothing to report in this regard.

***Responsibilities of Management and Those Charged with Governance for the Financial Statements***

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards (IFRS) and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Entity's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Entity or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Entity's financial reporting process.

***Auditors' Responsibilities for the Audit of the Financial Statements***

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.

The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Entity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Entity to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

- Provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

The engagement partner on the audit resulting in this auditors' report is Shane Doig.

## **MANAGEMENT'S REPORT**

To the Shareholders of Journey Energy Inc.

### **Management's Responsibility for the Consolidated Financial Statements:**

The accompanying consolidated financial statements of Journey Energy Inc. (the "Company") are the responsibility of Management and have been approved by the Board of Directors.

The consolidated financial statements have been prepared by Management in accordance with International Financial Reporting Standards ("IFRS"). When alternative accounting methods exist, management has chosen those methods it deems most appropriate in the circumstances. Financial statements are not precise since they include certain amounts based on estimates and judgments. Management has determined such amounts on a reasonable basis in order to ensure that the financial statements are presented fairly, in all material respects.

### **Management's Assessment of Internal Controls over Financial Reporting**

Management is also responsible for establishing and maintaining adequate internal control over the Company's financial reporting. Management has established systems for internal controls, which are designed to provide reasonable assurance the Company's assets are safeguarded from loss or unauthorized use and to produce reliable accounting records for the preparation of financial information. Internal control systems, no matter how well designed have inherent limitations. Therefore, even those systems that have been determined to be effective can only provide reasonable assurance with respect to financial statement preparation and presentation.

The Board of Directors is responsible for ensuring that management fulfils its responsibilities for financial reporting and internal controls. It exercises its responsibilities primarily through the Audit Committee, which is comprised of independent, non-management directors. The Audit Committee has reviewed the consolidated financial statements with both management and the Company's auditors. The Audit Committee meets at least on a quarterly basis and reports to the Board of Directors, which has approved the consolidated financial statements.

The consolidated financial statements have been audited by KPMG LLP, the external auditors, in accordance with auditing standards generally accepted in Canada on behalf of the shareholders. KPMG LLP was appointed by a vote of the shareholders at the Company's last annual meeting. The auditors have full and free access to, and meet periodically and separately with, the Audit Committee, and management to discuss their audit findings.

**Notes to the Consolidated Financial Statements**  
**For the years ended December 31, 2018 and 2017**  
*(thousands, except per share data)*

---

**1. INCORPORATION AND NATURE OF BUSINESS**

Journey Energy Inc. (“Journey” or “the Company”), is a publicly traded company engaged in the exploration, development and production of crude oil and natural gas in the province of Alberta, Canada. Journey’s shares trade on the Toronto Stock Exchange.

These consolidated financial statements present the results of operations for the Journey group of companies. Journey is comprised of the following entities: the Company and its wholly owned subsidiaries, Journey Energy Partnership and 1332993 Alberta Ltd.

The registered address of Journey is 2400, 525 8<sup>th</sup> Avenue SW Calgary, Alberta, Canada and the corporate head office is located at 700, 517-10<sup>th</sup> Avenue SW, Calgary, Alberta, Canada.

**2. BASIS OF PRESENTATION**

**a) Statement of compliance**

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”). The consolidated financial statements of the Company were authorized by the Board of Directors March 11, 2019.

**b) Basis of measurement**

The consolidated financial statements have been prepared on the basis of historical cost, except as disclosed in the accounting policies in Note 3.

**c) Functional and presentation currency and share data**

The consolidated financial statements are presented in Canadian Dollars, the Company’s functional currency and all amounts are rounded to the nearest thousand (\$’000) except where otherwise indicated. Share data is presented in thousands of shares except for per share data. The consolidated financial statements have, in management’s opinion, been prepared using careful judgment within the framework of the significant judgments, estimates and assumptions summarized in note 4.

**3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**a) Cash and cash equivalents**

Cash and cash equivalents include deposits held with banks, and other short-term highly liquid investments with original maturities of three months or less.

**b) Share capital**

Incremental costs directly attributable to the issuance of shares are recognized as a deduction from equity.

**c) Joint arrangements**

Many of Journey's exploration and production activities are conducted under joint operating agreements, whereby two or more parties jointly control the assets. These consolidated financial statements reflect only Journey's share of these jointly controlled assets, and once production commences, a proportionate share of relevant revenue and related costs.

**d) Revenue recognition**

Revenue is comprised of the fair value of the consideration received or receivable from the sale of natural gas and crude oil products in the ordinary course of the Company's activities and is recognized when control is transferred to the purchaser. This is generally met when title passes from the Company to its customer. Revenue from oil and gas production represents the Company's share, net of royalty payments to governments and freehold interest owners. Journey has reviewed the underlying contracts that generate its revenue streams and determined that IFRS 15 has no material impact on the Company's financial statements aside from enhanced disclosure related to revenue. The adoption of IFRS 15 resulted in a change in presentation between petroleum and natural gas sales and operating expenses with no impact on consolidated net income. The Company has retrospectively adopted this standard on the effective date of January 1, 2018.

**e) Consolidation**

The consolidated financial statements include the accounts of the Corporation and its subsidiaries, Journey Energy Partnership and 1332993 Alberta Ltd. (collectively "Journey Energy Inc."). The Company's subsidiaries include both incorporated and unincorporated entities, such as the partnership, for which the Corporation has the power to govern financial and operating policies. All intercompany transactions and balances are eliminated on consolidation.

**f) Oil and natural gas exploration, evaluation and development expenditures**

***i) Pre-exploration expenditures***

Expenditures made by the Company during the geological and geophysical evaluation phase and before acquiring the legal right to explore in a specific area do not meet the definition of an asset and therefore are expensed by the Company as incurred.

***ii) Exploration and evaluation expenditures ("E&E")***

Costs incurred after obtaining the rights to explore are capitalized as E&E intangible assets until the drilling of the well is complete and the results have been evaluated. These costs include, but are not limited to, exploration license expenditures, leasehold acquisition costs, evaluation costs including drilling costs directly attributable to an identifiable well and directly attributable general and administrative costs. These costs are accumulated in cost centres by property and are not subject to depletion until technical feasibility and commercial viability has been determined. If no reserves are found, the exploration asset is tested for impairment and if necessary, an impairment charge recognized as exploration and evaluation expense in the statement of comprehensive income may be taken. If extractable hydrocarbons are found and likely to be commercially developed, the costs will continue to be carried as an exploration and evaluation asset while sufficient/continued progress is made in assessing the commerciality of the hydrocarbons. The technical feasibility and commercial viability of extracting a hydrocarbon is considered determinable when proven or probable reserves are determined to exist. A review of each exploration license or field is carried out, at least annually, to ascertain whether proven or probable reserves have been discovered and to confirm the continued intent to develop or otherwise extract value from the discovery. Upon determination of proven or probable reserves, exploration and evaluation assets attributable to those reserves are tested for impairment and reclassified from exploration and evaluation assets to oil and

natural gas interest within property, plant and equipment. Expired lease costs are expensed as part of exploration and evaluation expense as they occur.

**iii) Development and production costs**

Oil and gas properties and other property, plant and equipment are stated at cost, less accumulated depreciation and any accumulated impairment losses. The cost of development and production assets includes: transfers from exploration and evaluation assets, which generally include the cost to drill development wells, including unsuccessful development or delineation wells, and the cost of associated land upon determination of technical feasibility and commercial viability; installation or completion of infrastructure facilities including the cost to complete and tie-in the wells; facility costs; the cost of recognizing provisions for future restoration and decommissioning; geological and geophysical costs; and directly attributable overheads; are all capitalized within Cash Generating Units ("CGUs") unless impaired. Development and production assets are grouped into CGUs for impairment testing. As at December 31, 2018 the Company has the following CGUs: Pine Creek, Pembina, Matziwin, Herronton, Skiff, Sylvan Lake, Crystal, Cherrill, and Countess.

**iv) Subsequent costs**

Costs incurred subsequent to the determination of technical feasibility and commercial viability and the costs of replacing parts of property, plant and equipment are recognized as oil and natural gas interests only when they increase future economic benefits embodied in the specific asset to which they relate. All other expenditures are recognized in the statement of comprehensive income as incurred. Such capitalized oil and natural gas interests generally represent costs incurred in developing proven and probable reserves and bringing in or enhancing production from such reserves, and are accumulated on a field or geotechnical area basis. The carrying amount of any replaced or sold component is derecognized. The costs of the day-to-day servicing of property, plant and equipment are recognized in the statement of comprehensive income (loss) as incurred.

**v) Depletion and depreciation**

The initial cost of an asset comprises its purchase price or construction cost, any costs directly attributable to bringing the asset into operation, the initial estimate of decommissioning obligation, and for qualifying assets, borrowing costs. The purchase price or construction cost is the aggregate amount paid and the fair value of any other consideration given to acquire the asset.

The net carrying value of development and production assets is depleted using the unit-of-production method based on production for the period divided by the Company's estimated total proved and probable oil and natural gas reserve volumes (before royalties) for that area. Production and reserves volumes for natural gas are converted at the energy equivalent of six thousand cubic feet of natural gas to one barrel of oil. Estimates of future development costs for developing the proved and probable reserves are included in each area's depletion base.

Depreciation of office furniture and equipment is provided for on a 20% declining balance basis, and computers and ancillary equipment use a 30% declining balance basis.

**vi) Dispositions**

Gains or losses are recognized on dispositions of property, plant and equipment and certain exploration and evaluation assets including asset swaps, farm-out transactions and complete dispositions. The gain or loss is measured as the difference between the fair value of the proceeds received, net of costs to sell, and the carrying value of the assets disposed, including capitalized asset decommissioning costs, unless the transaction lacks commercial substance or the fair value of neither the asset received nor the asset given up can be reliably measured.

When fair value is not used, the carrying amount of the asset given up is used as the cost of the asset acquired.

**g) Impairment**

I. Financial assets

A financial asset is assessed at each reporting date to determine whether there is any objective evidence that it is impaired. A financial asset is considered to be impaired if the evidence indicates that one or more events have had a negative impact on the estimated future cash flow of that asset.

An impairment loss in respect of a financial asset measured at amortized cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate.

All impairment losses are recognized in profit or loss in the period that the impairment is determined to have occurred. An impairment loss is reversed if the reversal can be related objectively to an event occurring after the impairment loss was recognized. For financial assets measured at amortized cost, the reversal is recognized in the statement of comprehensive income.

In relation to trade receivables, the Company employs an expected credit loss policy to derive the provision for impairment by risking outstanding accounts receivable to recognize an expected loss amount on the outstanding balance. Provisions for uncollectable amounts are also recorded when there is objective evidence (such as financial difficulty or the probability of default by the debtor) that the Company will not be able to collect all of the amounts due under the original terms of the invoice. The carrying amount of the receivable is reduced through the use of an allowance account. Impaired debts are written off against the allowance account when they are assessed as uncollectible.

II. Non-financial assets

Carrying values of exploration and evaluation assets, oil and gas properties and other property, plant and equipment are reviewed regularly to determine if indicators of impairment exist. If any indication of impairment exists, an estimate of the asset's recoverable amount is calculated. The recoverable amount is determined as the greater of the fair value of the asset less costs of disposal and the asset's value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets in which case it is determined at the CGU level. The Company has organized its assets into CGUs, which are the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or group of assets.

If the carrying amount of the CGU exceeds its recoverable amount, the asset is impaired and an impairment loss is charged to the statement of comprehensive income to reduce the carrying amount of the CGU to its recoverable amount.

Recoverable amounts are determined annually based on the greater of its fair value less costs of disposal or the value in use. Fair value less costs of disposal of oil and gas assets is generally determined by estimating the discounted after-tax future net cash flows for the CGUs. Future net cash flows are based on forecasted commodity prices and costs over the expected economic life of the proved and probable reserves and then discounted using market-based rates to arrive at a net present value of the CGU. Consideration is given to acquisition metrics of recent transactions completed on similar assets to those contained within the relevant CGU. Value in use is determined by estimating the present value of future net cash flows expected to be derived from the continued use of the asset in its present form and its eventual disposal.

For non-financial assets, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the Company makes an estimate of the recoverable amount. A previously recognized impairment loss is reversed only if objective evidence exists to support that there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of comprehensive income. Impairment losses recognized in relation to goodwill are not reversed for subsequent increases in its recoverable amount.

#### **h) Provisions**

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event; it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of comprehensive income (loss) net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

##### Decommissioning liability

The Company's activities give rise to dismantling, decommissioning and site disturbance remediation activities. A provision is made for the estimated cost of site restoration and capitalized in the relevant asset category.

A decommissioning liability is recognized when the Company has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount of obligation can be made as at the Consolidated Statement of Financial Position date by management. A corresponding amount equivalent to the provision is also recognized as part of the cost of the related property, plant and equipment. The amount recognized is the estimated cost of decommissioning, discounted to its present value. Changes in the estimated timing of decommissioning or decommissioning cost estimates are dealt with prospectively by recording an adjustment to the provision, and a corresponding adjustment to property, plant and equipment. The unwinding of the discount on the decommissioning provision is recognized as accretion expense within finance expenses. Actual costs incurred upon settlement of the decommissioning liabilities are charged against the provision to the extent that the provision was recognized.

#### **i) Share based compensation**

The Company has a stock option plan under which the entity may grant employees and directors the option to purchase common shares of the Company. The Board of Directors and shareholders have approved a policy of reserving up to 10% of the outstanding common shares plus 750,000 for issuance to reward eligible participants. All options awarded have a maximum term of five years and vest in equal one-third increments on each anniversary date of the grant. The Company accounts for stock options granted using the fair-value method, which estimates the value of the options at the grant date using a Black Scholes pricing model. The fair value thus established is recognized as compensation expense over the service period with an equivalent increase to contributed surplus. A forfeiture rate is estimated on the grant date and is subsequently adjusted to reflect the actual number of options that vest.

The Company also has an award plan comprised of the Restricted Stock Unit “RSU” plan and the Performance Stock Unit “PSU” plan. Under these plans, the Company may grant employees, directors and consultants RSU’s and or PSU’s that vest over two or three year periods from the date of issuance. RSU’s vest fifty percent on the second anniversary date of issuance and fifty percent on the third anniversary date of issuance. In 2018, the RSU’s vesting conditions on the October issuance was amended to vest equally over three years on the anniversary date of the issuance. The PSU’s cliff vest on the third anniversary date of issuance. The PSU plan also contains a performance multiplier that ranges from zero to two hundred percent based on the Company’s performance relative to a defined group of companies that are considered by Journey’s compensation consultant to be a suitable compensation peer group. Journey has the option of settling the units that vest either with shares of Journey or with cash. Share based compensation expenses related to RSU’s and PSU’s is determined by the fair value method. Fair value is determined by using the market price of Journey shares on the date of issuance. For PSU’s an assumed multiplier of 1.0 is used to determine their aggregate share-based compensation expense. The fair value is then recognized as compensation expense over the vesting period with an equivalent increase to contributed surplus. A forfeiture rate is estimated on the grant date and is subsequently adjusted to reflect the actual number of units that actually vest.

**j) Finance income and expenses**

Finance income is recognized as it accrues in profit or loss, using the effective interest method. Finance expense is comprised of: interest expense on borrowings, accretion of the discount rate on provisions, promissory notes and impairment losses recognized on financial assets.

**k) Income taxes**

**I. Current income tax**

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted as at the Consolidated Statement of Financial Position date. Current income tax relating to items recognized directly in equity is recognized in equity and not in the statement of comprehensive income (loss).

**II. Deferred income tax**

Deferred income tax is recognized, using the liability method, on temporary differences arising between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. However, deferred income tax is not accounted for if it arises from the initial recognition of an asset or liability in a transaction, other than a business combination, that at the time of the transaction affects neither the accounting nor taxable profit or loss. In addition, deferred income tax is not recognized for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date and are expected to apply when the related deferred tax asset is realized or the deferred income tax liability settled.

Deferred income tax assets are recognized to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized and the carry forward of unused tax losses can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they will be realized simultaneously.

**l) Obligations under lease**

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases are charged to the statement of comprehensive income (loss) on a straight-line basis over the period of the lease.

**m) Basic and diluted per share calculations**

Basic per share amounts are calculated using the weighted average number of shares outstanding during the period. The Company uses the treasury stock method to determine the dilutive effect of share based payments. Under the treasury stock method, only “in-the-money” dilutive instruments impact the diluted calculations in computing diluted per share amounts.

**n) Financial instruments**

All financial instruments, including all derivatives, are recognized on the Consolidated Statement of Financial Position initially at fair value. Subsequent measurement of financial assets and liabilities depends on the classification of the item as discussed below. The Company uses the following classifications for its financial instruments:

<b>Financial asset or liability</b>	<b>Measurement</b>
Cash	Amortized cost
Accounts receivable and accrued revenues	Amortized cost
Derivative contracts	Fair value through statement of income (loss)
Accounts payable and accrued liabilities	Amortized cost
Bank debt	Amortized cost
Promissory Notes	Amortized cost

Transaction costs attributable to financial instruments recorded at amortized cost are included in the recognized amount of the related financial instrument and recognized over the life of the resulting financial instrument using the effective interest rate method.

The Company uses, from time to time, financial derivatives and non-financial derivatives, such as commodity sales contracts requiring physical delivery, to manage the price risk attributable to anticipated sale of petroleum and natural gas production and foreign exchange exposures. The Company does not enter into derivative financial instruments for trading or speculative purposes. Journey has not designated its financial derivative contracts as effective accounting hedges, and thus has not applied hedge accounting, even though the Company considers all commodity contracts to be economic hedges. As a result, financial derivatives are classified as fair value through the statement of comprehensive income (loss) and are recorded on the Consolidated Statement of Financial Position at fair value.

The Company accounts for any physical sales and purchase contracts as executory contracts and as such are not recorded at fair value on the Consolidated Statement of Financial Position. Settlements on these physical sales contracts are recognized in petroleum and natural gas sales.

Derivatives embedded in financial liabilities recorded at amortized cost are treated as separate derivatives when their risks and characteristics are not closely related to those of the host contract. Contracts are assessed for embedded derivatives when the Company becomes a party to them, including at the date of a business combination.

Financial instruments measured at fair value on the Consolidated Statement of Financial Position require classification into one of the following levels of the fair value hierarchy:

Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2: Inputs, other than quoted prices included in Level 1, that are observable for the asset or liability, either directly or indirectly as of the reporting date. Level 2 valuations are based on inputs, including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the marketplace.

Level 3 – Inputs for the asset or liability that are not based on observable market data.

The fair value hierarchy level at which a fair value measurement is categorized is determined on the basis of the lowest level input that is significant to the fair value measurement of in its entirety. The Company has categorized its financial instruments that are fair valued on the Consolidated Statement of Financial Position according to the fair value hierarchy above (Note 19).

#### **o) Flow through shares**

Flow through shares permit an investor to claim deductions for tax purposes related to expenditures incurred by the issuer. The issuer explicitly renounces the right to claim these deductions in favor of the investor.

The proceeds from the issuance of flow through shares are allocated between the offering of shares and the sale of tax benefits when the shares are offered. The allocation is made based on the difference between the quoted price of the existing shares and the amount the investor pays for the flow through shares. A deferred liability is recognized for this difference. The liability is derecognized when the qualifying tax attributes are renounced to the investor and qualifying expenditures have been incurred. At the time, the renunciation documents are filed with the taxing authorities and the qualifying expenditures have been incurred, a deferred tax liability is recognized for the tax benefits foregone. Any difference between the deferred liability set up for the premium on the flow-through shares and the tax effect on the renounced expenditures is recognized in profit or loss.

#### **4. SIGNIFICANT ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS**

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. By their nature, these estimates are subject to measurement uncertainty and the effect on the financial statements of changes in such estimates in future periods could be material. Estimates and judgments are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes can materially differ from these estimates.

In the process of applying the Company's accounting policies, management has made the following judgements, estimates, and assumptions which have the most significant effect on the amounts recognized in the financial statements:

##### **I. Accounts receivable**

Accounts receivable are recorded at the estimated recoverable amount, which involves an estimate of uncollectible amounts.

##### **II. Derivatives**

The fair value of derivative contracts are based on published market prices as at the Consolidated Statement of Financial Position date and may differ from what will eventually be realized.

Changes in the fair value of the derivative contracts are recognized in the statement of comprehensive income (loss). The actual gains and losses realized on eventual cash settlement can vary due to subsequent fluctuations in commodity prices.

### III. Oil and gas reserves

Oil and gas development and production properties are depreciated on a unit of production basis at a rate calculated by reference to proved and probable reserves determined in accordance with the NI 51-101 *“Standards of Disclosure for Oil and Gas Activities”* and incorporating the estimated future cost of developing and extracting those reserves. Commercial reserves are determined using estimates of oil and natural gas in place, recovery factors and future prices. Future development costs are estimated using assumptions as to the number of wells required to produce the commercial reserves, the cost of such wells and associated production facilities, and other capital costs. There are numerous uncertainties inherent in estimating oil and gas reserves. The key estimates used in the determination of cash flows from oil and natural gas reserves include the following:

- i) Reserves – Assumptions that are valid at the time of reserve estimation may change significantly when new information becomes available. Changes in forward price estimates, production costs or recovery rates can materially affect the estimation of reserves.
- ii) Oil and natural gas prices – Forward price estimates are used in the cash flow models. Commodity prices can fluctuate for a variety of reasons including supply and demand fundamentals, inventory levels, exchange rates, weather and economic and geopolitical factors.

Estimating reserves is very complex, requiring many judgements based on geological, geophysical, engineering and economic data. These estimates may change, having either a positive or a negative impact on net earnings as further information becomes available and as the economic environment changes.

### IV. Depletion and depreciation

Depletion of oil and gas properties is provided using the unit-of-production method and is based on sales volumes (before royalties) in relation to total estimated proved and probable reserves as determined by internal reserve evaluations for the first three quarters of the year and then at year-end by the Company’s independent engineers. Natural gas reserves and sales volumes are converted at an assumed energy equivalent of six thousand cubic feet to one barrel of oil. Calculations for depletion of oil and gas properties including production equipment and facilities are based on total capitalized costs plus estimated future development costs of proved and probable reserves less the estimated net realizable value of production equipment and facilities after the reserves are fully produced. Exploration and evaluation costs are excluded from depletion calculations.

The calculation of the unit-of-production rate of amortization could be impacted to the extent that the actual sales volume in the future is different from current forecast sales volume. This would generally result from significant changes in any of the factors or assumptions used in estimating reserves.

These factors could include:

- Changes in proved and probable reserves.
- Changes in estimates of future development costs.
- The effect on proved and probable reserves of differences between actual production as compared to forecasts as well as commodity price assumptions.
- Unforeseen operational issues.

V. Exploration and evaluation (“E&E”) assets

The decision to transfer assets from E&E to property, plant and equipment is based on the estimated proved and probable reserves, which are in part used to determine a project’s technical feasibility and commercial viability.

VI. Impairment and impairment recoveries

The recoverable amounts of CGUs and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to dispose. These calculations require the use of estimates and assumptions including information on future commodity prices, expected sales volumes, quantity of reserves, discount rates, as well as future development and operating costs. Key assumptions in the determination of cash flows from reserves include reserves estimated by the Company’s independent qualified reserve evaluators. It is possible that any or all of these key assumptions may change which may then impact the estimated values of the oil and gas properties and then require a material adjustment to the carrying value of E&E assets and property, plant and equipment. The Company monitors internal and external indicators of impairment relating to its tangible and intangible assets.

VII. Cash Generating Unit (“CGU”) definition

The determination of CGUs requires judgement in defining the smallest identifiable group of assets that generate cash inflows that are largely independent of the cash inflows from other assets or groups of assets. CGUs are determined by similar geological structure, shared infrastructure, geographical proximity, commodity type, similar exposure to market risk and materiality. The asset composition of a CGU can directly affect the recoverability of the assets included therein.

VIII. Decommissioning costs

Decommissioning costs will be incurred by the Company at the end of the operating life of certain facilities and properties. The ultimate decommissioning costs are uncertain and cost estimates can vary in response to many factors including changes to relevant regulatory requirements, the emergence of new restoration techniques or experience at other production sites. The expected timing and amount of expenditures can also change, for example in response to changes in reserves or changes in laws and regulations or their interpretation. In addition, the Company determines the appropriate discount rate at the end of each reporting period. The Company uses a risk-free discount rate to determine the present value of the estimated future cash outflows to settle the obligation and may change in response to numerous market factors. As a result, there could be significant adjustments to the provisions established which would affect future financial results.

IX. Share based compensation

The fair value of stock options, RSU’s, PSU’s and performance warrants granted are measured using a modified Black-Scholes pricing model. Measurement inputs include the Company’s share price on the measurement date, the exercise price of the option, the expected volatility of the Company’s shares, the expected life of the options and warrants, expected dividends and the risk-free rate of return. Where applicable, the expected volatility considers the historical volatility in the price of Journey’s publicly traded common shares over a period similar to the life of the equity grant, and in Management’s opinion, is indicative of future trends. The expected life of the options is based on historical experience and estimates of the holder’s behaviour. Management also makes an estimate of the number of options that will be forfeited and the rate is adjusted to reflect the actual number of options that actually vest.

X. Income taxes

The Company recognizes the net future tax benefit related to deferred income tax assets to the extent that it is probable that the deductible temporary differences will reverse in the foreseeable future. Assessing the recoverability of deferred income tax assets requires significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws in each jurisdiction in which the Company operates. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the Company to realize the net deferred tax assets recorded in the Consolidated Statement of Financial Position date could be materially impacted.

XI. Business Combinations

The determination of whether a transaction is a business combination or an asset acquisition is based on Management's assessment of each individual transaction based on the criteria outlined in IFRS 3. If determined to be a business combination the Company applies the acquisition method to account for the recognition and measurement of identifiable assets acquired, the liabilities assumed, any non-controlling interest and, if applicable, goodwill or a gain on the transaction.

**5. ACCOUNTING POLICIES NOT YET ADOPTED**

On January 13, 2016, the IASB issued IFRS 16, "*Leases*" ("IFRS 16"), which requires entities to recognize lease assets and lease obligations on the balance sheet. IFRS 16 removes the classification of leases as either operating leases or finance leases for the lessee, effectively, treating all leases as finance leases. Short-term leases of less than 12 months and leases of low value assets are exempt from the requirements and can continue to be treated as operating leases. Lessors will continue with the dual classification and that classification will determine how and when lease revenue will be recognized and what assets will be recorded. IFRS 16 is effective for years beginning on or after January 1, 2019.

Journey adopted the standard on the effective date of January 1, 2019 and has selected the modified retrospective approach. We have also elected to exempt short-term leases and leases of low value assets. We have conducted an examination of our lease contracts that are significant in nature and therefore not exempt. On adoption, the Company will recognize lease liabilities in relation to leases under principles of the new standard measured at the present value of the remaining lease payments discounted using the interest rate implicit in the lease or the Company's incremental borrowing rate as of January 1, 2019.

Adoption of the new standard will result in the recognition of additional lease liabilities and right of use ("ROU") assets of approximately \$6,893 and \$7,674 respectively. Management has identified ROU assets and lease liabilities primarily related to office space. The impact on the consolidated statement of earnings will be lower general and administrative expenses, higher finance expenses due to interest recognized on the lease obligations and higher depreciation expense related to the ROU assets.

6. **PROPERTY, PLANT AND EQUIPMENT**

	<b>Petroleum and natural gas properties</b>	<b>Administrative</b>	<b>Total</b>
Balance, January 1, 2017	1,159,391	4,207	1,163,598
Additions	29,842	84	29,926

<b>Balance, December 31, 2017</b>	<b>1,236,982</b>	<b>4,291</b>	<b>1,241,273</b>
Additions	26,034	37	26,071
Acquisition of producing petroleum and natural gas assets	452	-	452
Changes in decommissioning obligations	5,492	-	5,492
Capitalized share-based compensation	409	-	409
Dispositions of producing petroleum and natural gas assets	(6,368)	-	(6,368)
Transfer from exploration and evaluation assets	313	-	313
<b>Balance, December 31, 2018</b>	<b>1,263,314</b>	<b>4,328</b>	<b>1,267,642</b>

	<b>Petroleum and natural gas properties</b>	<b>Administrative</b>	<b>Total</b>
<b>Accumulated Depletion, Depreciation and Impairment losses</b>			
Balance, January 1, 2017	(829,931)	(3,785)	(833,716)
Provision for the year	(34,712)	(141)	(34,853)
Disposals	12,044	-	12,044
Impairment	(50,328)	-	(50,328)
Impairment reversal	11,062	-	11,062
<b>Balance, December 31, 2017</b>	<b>(891,865)</b>	<b>(3,926)</b>	<b>(895,791)</b>
Provision for the year	(33,076)	(117)	(33,193)
Disposals	3,150	-	3,150
<b>Balance, December 31, 2018</b>	<b>(921,791)</b>	<b>(4,043)</b>	<b>(925,834)</b>

	<b>Petroleum and natural gas properties</b>	<b>Administrative</b>	<b>Total</b>
<b>Carrying Amounts</b>			
January 1, 2017	329,460	422	329,882
December 31, 2017	345,117	365	345,482
<b>December 31, 2018</b>	<b>341,523</b>	<b>285</b>	<b>341,808</b>

Future development costs on proved plus probable undeveloped reserves of \$206,913 (December 31, 2017 - \$208,625) were included in the depletion calculation. During the year ended December 31, 2018, the Company capitalized \$1,271 (2017 - \$1,180) in salary, wages and benefits, and \$409 (2017 - \$568) of share based compensation expense that was directly related to developmental drilling activities.

In 2018 the Company disposed of non-core properties for cash proceeds of \$5,393 (2017 - \$6,350), which resulted in a gain of \$4,064 (2017 - \$5,596) being recorded in the comprehensive statement of loss.

At December 31, 2018, the Company assessed whether there were indicators of impairment. The assessment factored in reserves, change in commodity prices year over year, interest rates, health of the sector and the general economy, well performance and near term development plans. It was determined that indicators were present for the Herronton CGU only and as a result, it was tested. It was determined that the carrying amount of the Herronton CGU had not exceeded its recoverable amount and therefore there was no impairment. Recoverable amount was calculated as the fair value of the assets less cost of disposal. The fair value less costs to dispose was determined with a discounted cash flow approach based on the year-end proved plus probable reserves and using an average of three reserve engineer's forecast commodity prices. Journey used a risk adjusted discount rate was based on the nature of the assets held in the CGU to determine the fair value at the measurement date.

The table below summarizes the benchmark prices for the next thirteen years used by the independent reserve evaluators in preparing the Company's 2018 reserve report.

	<b>WTI Cushing Oklahoma (\$US/bbl)</b>	<b>MSW Light Edmonton 40 API (\$CDN/bbl)</b>	<b>Alberta AECO-spot (\$CDN/mmbtu)</b>	<b>Foreign Exchange (\$US/\$CDN)</b>
2019	58.58	67.30	1.88	0.7567
2020	64.60	75.84	2.31	0.7817
2021	68.20	80.17	2.74	0.7967
2022	71.00	83.22	3.05	0.8033
2023	72.81	85.34	3.21	0.8267
2024	74.59	87.33	3.31	0.8083
2025	76.42	89.50	3.39	0.8083
2026	78.40	91.89	3.46	0.8083
2027	79.98	93.76	3.54	0.8083
2028	81.59	95.68	3.62	0.8083
2029	83.22	97.57	3.70	0.8083
2030	84.87	99.52	3.78	0.8083
2031	86.57	101.52	3.85	0.8083

The annual escalation rate used after 2031 is 2.0%.

In 2017, the Company tested its CGU's for impairment as well as the potential reversal of prior period impairments where indicators were present. It was determined that the carrying amounts of the Matziwin, Pembina, Pine Creek, Sylvan Lake, and Crystal CGUs exceeded their recoverable amount. Recoverable amount was calculated as the fair value of the assets less cost of disposal. The fair value less costs to dispose was determined with a discounted cash flow approach based on the year-end proved plus probable reserves and using an average of three reserve engineer's forecast commodity prices. Journey used a risk adjusted discount rate that varied by CGU based on the nature of the assets held in each CGU to determine the fair value at the measurement date. An impairment loss of \$50,328 was recorded for the year. The following table summarizes the impairments, recoverable amount and discount rate used for each CGU that was impaired during the year ended December 31, 2017.

<b>CGU description</b>	<b>Recoverable amount</b>	<b>Risk adjusted discount rate</b>	<b>Impairment</b>
Matziwin	50,420	10.0	13,342
Pembina	6,418	10.0	4,614
Pine Creek	6,712	14.6	6,430
Sylvan Lake	56,986	13.6	15,168
Crystal	55,908	13.8	10,774
	176,444		50,328

The impairment in these five CGUs was primarily attributable to the decline in future natural gas prices as used in the independent reserve evaluation as well as well performance in the Sylvan and Crystal CGUs. A one percent increase in the assumed discount rate would result in an additional impairment of \$16,344 for 2017 while a ten percent decrease in future planned cash flows would have increased the impairment for 2017 by \$27,084.

Journey further determined in 2017, the Herronton and Countess CGU's recoverable amounts were greater than their carrying values and consequently an impairment reversal of \$11,062 was required.

<b>CGU description</b>	<b>Recoverable amount</b>	<b>Risk adjusted discount rate</b>	<b>Impairment reversal</b>
Herronton	27,194	12.0	10,634
Countess	45,814	13.8	428
	73,008		11,062

The table below summarizes the benchmark prices for the next thirteen years used by the independent reserve evaluators in preparing the Company's 2017 reserve report.

	<b>WTI Cushing Oklahoma (\$US/bbl)</b>	<b>MSW Light Edmonton 40 API (\$CDN/bbl)</b>	<b>Alberta AECO-spot (\$CDN/mmbtu)</b>	<b>Foreign Exchange (\$US/\$CDN)</b>
2018	57.50	68.60	2.43	0.7900
2019	60.90	72.02	2.77	0.8000
2020	64.13	74.48	3.19	0.8167
2021	68.33	78.60	3.48	0.8233
2022	71.19	80.84	3.67	0.8400
2023	73.15	82.83	3.76	0.8400
2024	75.16	85.17	3.85	0.8400
2025	77.17	87.53	3.93	0.8400
2026	79.01	89.66	4.02	0.8400
2027	80.60	91.49	4.10	0.8400
2028	82.20	93.31	4.19	0.8400
2029	83.83	95.15	4.28	0.8400
2030	85.52	97.09	4.37	0.8400

The annual escalation rate used after 2030 is 2.0%.

## 7. EXPLORATION AND EVALUATION ASSETS

Exploration and evaluation assets consist of the Company's exploration projects, which are pending the determination of proven or probable reserves. For the year ended December 31, 2018 \$313 (December 31, 2017 - \$nil) was transferred to property, plant and equipment following the successful discovery of proven or probable reserves. Management determined that the fair value less costs of disposal of certain undeveloped lands had declined below Journey's carrying values and consequently an impairment of \$1,186 (2017 - \$333) was realized.

Balance, January 1, 2017	9,991
Additions	2,664
Acquisitions	2,938
Disposals	(224)
Lease expiries	(1,988)
Transfer to expense	(1,715)
Impairment	(333)
Balance, December 31, 2017	11,333
Additions	2,146
Acquisitions	3,659
Disposals	(172)
Lease expiries	(1,982)
Transfer to expense	(75)
Transfer to property, plant and equipment assets	(313)
Impairment	(1,186)
<b>Balance, December 31, 2018</b>	<b>13,410</b>

## 8. ACQUISITIONS

During 2018 Journey made four minor acquisitions for cumulative acquisition costs of \$452 (cash consideration \$161). The impact of these acquisitions on revenue and net income (loss) was not significant.

During 2017, the Company made the following acquisitions:

- a) On January 25, 2017, the Company closed the acquisition of certain light oil and natural gas properties in the Crystal area, which complemented the company's existing assets in the area. The acquisition was accounted for as a business combination under IFRS 3. This acquisition contributed \$1,028 to revenue and \$567 to net income before tax for the post acquisition period. Had the properties been acquired on January 1, 2017 the effect on revenue would have been \$1,083 and the impact on net income before tax would have been \$601.

<b>Fair value of net assets acquired</b>	<b>\$</b>
Petroleum and natural gas properties	<b>2,578</b>
Exploration and evaluation assets	<b>247</b>

	<b>2,737</b>
<b>Consideration:</b>	
Cash	<b>2,737</b>
	<b>2,737</b>

- b) On April 28, 2017, the Company closed the acquisition of certain light oil and natural gas properties predominantly in the Gilby and Pine Creek areas, which complemented the company's existing assets in the area. The acquisition was accounted for as a business combination under IFRS 3. As part of the acquisition, the Company incurred \$628 of transaction costs. This acquisition contributed \$10,218 to revenue and \$4,216 to net income before tax for the post acquisition period. Had the properties been acquired on January 1, 2017 the effect on revenue would have been \$15,222 and the impact on net income (loss) before tax would have been \$6,281.

<b>Fair value of net assets acquired</b>	<b>\$</b>
Petroleum and natural gas properties	42,739
Exploration and evaluation assets	2,641
Decommissioning liability	(10,950)
	<b>34,430</b>
<b>Consideration:</b>	
Share consideration	6,000
Cash	28,430
	<b>34,430</b>

- c) On November 30, 2017, the Company closed the acquisition of light oil and natural gas properties in the Gilby area. The acquisition was accounted for as a business combination under IFRS 3. This acquisition contributed \$93 to revenue and \$51 to net operating income for the post acquisition period. If the properties had been acquired on January 1, 2017 the effect on revenue would have been \$1,117 and a \$614 impact on operating income.

<b>Fair value of net assets acquired</b>	<b>\$</b>
Petroleum and natural gas properties	2,198
Decommissioning liability	(1,204)
	<b>994</b>
<b>Consideration:</b>	
Cash	994
	<b>994</b>

In addition to the above Journey made eight other minor acquisitions that had cumulative acquisition costs of \$3,181 (\$1,227 cash consideration). Six of the acquisitions were cash purchases and the other two through asset swap arrangements.

## 9. BANK DEBT

Journey has an available credit facility of \$100,000 at December 31, 2018 (December 31, 2017 - \$125,000) with a syndicate of Canadian banks. This facility is comprised of a production facility of \$85,000 and a working capital facility of \$15,000. The production and working capital facilities are available on a revolving basis until April 30, 2019. Upon Journey's request, and subject to the syndicates' approval, the facilities may be extended each year pursuant to the annual review. If the syndicate does not extend the facilities, then the full amount will become due and payable on April 30, 2020. Advances under the facilities are available by way of prime rate loans with interest rates ranging between 1.0 percent and 4.5 percent above the banks' prime lending rates. In addition to these prime rate advances, the Company has access to bankers' acceptances and LIBOR loans, which are subject to stamping fees and margins ranging from 2.0 percent to 5.5 percent depending on the debt to cash flow ratio as calculated as of the Company's immediately preceding quarterly earnings period. In addition, standby fees on the undrawn facilities are charged at rates ranging from 0.5 percent to 1.375 percent depending on the debt to cash flow ratio as calculated at the Company's immediately preceding fiscal quarters' end.

The effective annualized interest rate on the credit facility, including renewal fees for the year ended December 31, 2018 was 6.6% (December 31, 2017 – 5.9%). At December 31, 2018, the Company had an outstanding letter of credit in the amount of \$75 that expires on June 30, 2019.

The credit facilities are secured by a \$500,000 fixed and floating charge debenture over the petroleum and natural gas properties and all other assets of Journey. The facilities are subject to a semi-annual review, at which time the lenders may re-determine the borrowing base based on changes to reserves

and/or forecast prices. Pursuant to the mid-year year review and effective October 31, 2018 the borrowing base of \$100,000 was re-confirmed by the lending syndicate. There are certain standard non-financial covenants in the credit facility agreement. Journey is in compliance with all covenants as at December 31, 2018 and December 31, 2017.

	<b>December 31, 2018</b>	December 31, 2017
Bank indebtedness	<b>1,009</b>	-
Revolving credit facility	<b>75,500</b>	70,000
Unamortized deferred financing costs	<b>(42)</b>	(78)
<b>Balance, at end of year</b>	<b>76,467</b>	69,922

## 10. PROMISSORY NOTES

On October 6, 2016 Journey entered into a private placement financing (“Promissory Notes (A)”) whereby 30,000 units (the “Units”) were issued at a per unit price of \$1,000 for aggregate proceeds of \$30,000. Each unit is comprised of: (i) one promissory note (the “Notes”) with a par value of \$1 thousand per Note, bearing interest at 7.65% per annum with interest payable semi-annually, and (ii) 165 common share purchase warrants (the “Warrants”). The Notes mature on October 31, 2020 and all or a portion of the outstanding principal can be repaid by Journey without penalty after two years. The Notes are secured by a \$30,000 floating charge debenture over all of the Company’s assets and are subordinate to any current or future claims under the banking credit facility (Note 9). A total of 4,950 warrants were issued under this placement and were originally set to expire on October 6, 2018. The Warrants were convertible into common shares on a one for one basis and had an exercise price of \$2.75 per warrant. On March 2, 2017, all of the Warrants were exercised and 4,950 common shares were issued.

The fair value of the notes was determined at the date of issuance to be \$27,924 with an effective interest rate of 9.4%. The difference between the principal amount of the Notes and the discounted value was allocated to the value of the Warrants. The initial value of the debt will accrete up to the principal amount of the Notes throughout the term of the Notes. For the year ended December 31, 2018 Journey recognized \$2,295 (2017 - \$2,295) of interest and \$492 (2017 - \$447) of accretion related to the Promissory Notes (A).

Promissory Notes (A), January 1, 2017	<b>27,953</b>
Accretion expense	<b>447</b>
Unamortized deferred issuance expenses	<b>(2)</b>
Promissory Notes (A), December 31, 2017	<b>28,398</b>
Accretion expense	<b>492</b>
Amortized deferred issuance expenses	<b>25</b>
<b>Promissory Notes (A), December 31, 2018</b>	<b>28,915</b>

On February 1, 2018 Journey entered into a second private placement of promissory notes (“Promissory Notes (B)”) whereby 22,000 units (the “Units”) were issued at a price of \$1,000 per unit for aggregate proceeds of \$22,000. Each Unit is comprised of: (i) one promissory note with a par value of \$1 thousand, bearing interest at 7.65% per annum with interest payable semi-annually, and (ii) 105 common share purchase warrants. Promissory Notes (B) mature on September 30, 2022 and all or a portion of the outstanding principal can be repaid by Journey without penalty after three years. The Notes are secured by a \$22,000 floating charge debenture over all of the Company’s assets and are subordinate to any current or future claims under the banking credit facility (Note 9). 2,310 Warrants were issued under this placement and expire on June 1, 2020. The Warrants are convertible into common shares of Journey on a one for one basis and have an exercise price of \$2.51 per Warrant.

The fair value of the debt component was determined at the date of issuance to be \$20,298 using the effective interest rate method (9.3%). Under this method, the future payments of interest and principal are discounted using a rate of interest that would be reflective of a similar debt instrument, but without

the warrant-feature. The difference between the principal amount and the discounted value was allocated to the value of the Warrants. The initial value of the debt will accrete up to the principal amount of the Notes throughout the term of the Notes. For the year ended December 31, 2018 Journey recognized \$1,535 (2017 - \$nil) of interest and \$277 (2017 - \$nil) of accretion related to the Promissory Notes (B).

Principal amount of Promissory Notes (B)	<b>22,000</b>
Less: value allocated to Warrants	<b>(1,702)</b>
Fair value at date of issue on February 1, 2018	<b>20,298</b>
Accretion expense	<b>277</b>
Unamortized deferred issuance expenses	<b>(54)</b>
<b>Promissory Notes (B) December 31, 2018</b>	<b>20,521</b>

## 11. DECOMMISSIONING LIABILITIES

The Company's decommissioning liabilities result from the net ownership interests it has in petroleum and natural gas assets, which include well sites, pipelines, processing facilities and oil batteries. The Company estimates the total undiscounted, unescalated amount of cash flows required to settle its decommissioning liabilities at December 31, 2018 to be \$190,065 (December 31, 2017 - \$190,026,) the majority of which, will be incurred at various times between 2019 and 2070. The present value of the decommissioning liabilities as at December 31, 2018 was calculated using a risk free rate of 2.1% (December 31, 2017 – 2.2%) and an inflation factor of 2.0% (December 31, 2017 – 2.0%). Settlement of the liabilities will be funded from general corporate funds at the time of retirement or removal. As at December 31, 2018, no funds have been set aside to settle these obligations. Changes to decommissioning liabilities during the years ended December 31, were as follows:

	<b>2018</b>	2017
Balance, at beginning of year	<b>175,495</b>	149,296
Liabilities acquired of during year	<b>292</b>	14,244
Revaluation of liabilities acquired during the year <sup>(1)</sup>	<b>506</b>	23,917
Liabilities disposed of during the year	<b>(2,061)</b>	(5,842)
Incurred on development activities during the year	<b>926</b>	1,164
Liabilities settled during the year	<b>(1,288)</b>	(827)
Revisions to estimates	<b>2,167</b>	(3,220)
Changes in discount rate	<b>1,893</b>	(6,958)
Accretion	<b>3,919</b>	3,721
<b>Balance, at end of year</b>	<b>181,849</b>	175,495

<sup>(1)</sup> These amounts relate to the revaluation of acquired decommissioning liabilities using a risk-free discount rate. At the dates of acquisition, the acquired decommissioning liabilities were fair valued at the credit adjusted risk free rate.

## 12. SHARE CAPITAL

As at December 31, 2018 Journey has an unlimited number of voting common shares that may be authorized and issued. Each common share is transferable, carries the right to one vote and represents an equal undivided beneficial interest in any dividends from the Company and in the assets in the event of termination or winding up of the Company. All common shares have no par value and are of the same class with equal rights and privileges. In addition, the Company has an unlimited number of preferred shares with no par value available for issuance.

<b>COMMON SHARES</b>	<b>Number</b>	<b>Amount</b>
<b>Balance, January 1, 2017</b>	43,703	368,428
Issued on warrant exercise (Note 13)	4,950	15,688
Normal course issuer bid (i)	(1,270)	(9,627)
Issued on asset acquisition (Note 8(b))	2,076	6,000
Issued for services rendered (ii)	185	535
Issued on exercise of PSU's and RSU's	576	2,808
Flow-through shares issued (iii)	1,020	2,193
Share issue costs, net of tax	-	(8)
<b>Balance, December 31, 2017</b>	51,240	386,017
Share repurchase (iv)	(12,700)	(95,674)
Issued on exercise of stock options	7	17
Issued on exercise of PSU's and RSU's	671	1,604
<b>Balance, December 31, 2018</b>	<b>39,218</b>	<b>291,964</b>

i. *Normal course issuer bid*

Pursuant to the Normal Course Issuer Bid ("NCIB") approved by the Toronto Stock Exchange, the Company was authorized to purchase up to 2,522 common shares for cancellation. The bid period commenced on June 19, 2017 and was initially set to end on June 18, 2018. As required by the Toronto Stock Exchange, the NCIB terminated on February 2, 2018. During the year ended December 31, 2017 Journey repurchased 1,270 shares for \$2,160 representing an average cost of \$1.70 per common share. \$9,627 was charged to share capital and the balance of \$7,467 was charged to contributed surplus.

ii. *Transaction costs*

185 common shares at a value of \$535 were issued in lieu of cash payment for advisory fees to an investment bank in respect of the Gilby/Pine Creek acquisition (Note 8(b)).

iii. *Flow through shares*

On October 11, 2017 1,020 flow-through shares were issued for total proceeds of \$2,244. A deferred liability of \$51 was recognized for the premium on the flow-through shares. The liability was de-recognized when the Company incurred the qualifying expenditures with the offsetting amount going to share capital. The difference between the liability and the tax effect of renounced expenditures of \$555 was recognized in the statement of comprehensive loss as deferred income tax expense. All qualifying expenditures were incurred before December 31, 2017.

iv. *Share repurchase*

On February 2, 2018, Journey acquired 12,700 common shares from a significant shareholder for \$21,336, representing an average price of \$1.68. \$95,674 was charged to share capital and the difference of \$74,338 was included in contributed surplus.

### 13. WARRANTS

	Number	Amount
<b>Balance, January 1, 2017</b>	4,950	2,076
Exercised	(4,950)	(2,076)
<b>Balance, December 31, 2017</b>	-	-
Issued	2,310	1,702
<b>Balance, December 31, 2018</b>	<b>2,310</b>	<b>1,702</b>

As part of a private placement of Promissory Notes (A) (Note 10), 4,950 share purchase warrants were issued. The warrants were convertible into common shares of Journey on a one for one basis and having an exercise price of \$2.75 per warrant. The fair value of the warrants was determined by discounting the total principal and interest payments and subtracting this from the nominal amount of the principal and interest payments (Note 10). On March 2, 2017, all of the outstanding warrants relating to the 2016 Promissory Notes were exercised and 4,950 common shares were issued.

As part of a private placement of 2018 Promissory Notes (Note 10), 2,310 share purchase warrants were issued to the holder of the notes. The warrants are convertible into common shares of Journey on a one for one basis and have an exercise price of \$2.51 per warrant.

### 14. SHARE BASED COMPENSATION

The shareholders of Journey have approved a share based compensation plan which allows for up to 10% of the post-initial public offering common shares outstanding, to be reserved for issuance under the plan. 4,356 (2017 – 4,506) of the incentive units outstanding as of December 31, 2018 count towards the 10% limitation. 122 incentive units outstanding as of December 31, 2018 (December 31, 2017 – 2,623) that were issued before the Company went public in June of 2014 were excluded from this limitation. Below are the long-term incentives currently outstanding under the share based compensation plan.

#### a) Restricted share units (“RSU”)

RSU’s may be granted to employees as part of their compensation. RSU’s vest over three years from the date of issuance. Half of the RSU’s vest on the second anniversary of issuance and half on the third anniversary for all issuances prior to September 30, 2018. The vesting terms on the grant of RSUs and PSUs in October of 2018 were modified to vest equally over the three year term on the anniversary of the date of issuance. Upon vesting, the RSU’s are settled by Journey either issuing the employee shares from treasury or by way of cash payment. The method of settlement is at the sole discretion of the Company. The fair value of the RSU’s is deemed to be equal to the stock price of the Company on the date of grant. During the year ended December 31, 2018, \$1,982 (2017 – \$2,145) was charged to share based compensation expense in respect of the RSU’s.

The following table summarizes the number of RSU’s outstanding:

<b>Balance at January 1, 2017</b>	1,308
Granted	1,593
Exercised	(712)
Forfeited	(95)
<b>Balance at December 31, 2017</b>	2,094
Granted	799
Exercised	(526)
Forfeited	(89)
<b>Balance at December 31, 2018</b>	<b>2,278</b>

As at December 31, 2018 and December 31, 2017 there were no RSU's that were exercisable.

b) Performance share units ("PSU")

The Company grants PSU's to certain employees that cliff vest on the third anniversary from the date of issuance. The PSU's have a performance multiplier relating to the Company's share price performance relative to an established group of peer companies. This type of feature is dependent on market conditions, and therefore is required to be incorporated into the measurement of the grant date fair value. The Company has determined the most probable outcome is performance relatively equal to our peer group and has accordingly used a multiplier of one for the calculation of fair value on the date of issuance. During the period ended December 31, 2018 \$1,034 (2017 – \$482) was charged to share based compensation expense. The settlement method is at the sole discretion of the Company in either cash or shares issued from treasury.

The following table summarizes the number of PSU's outstanding:

<b>Balance at January 1, 2017</b>	504
Granted	305
Exercised	(65)
Forfeited	(15)
<b>Balance at December 31, 2017</b>	729
Granted	359
Exercised	(171)
Forfeited	(23)
<b>Balance at December 31, 2018</b>	894

As at December 31, 2018 and December 31, 2017 there were no PSU's that were exercisable.

c) Stock option plan

All stock options granted have a maximum term of five years and vest in equal one-third increments on each anniversary of the grant.

The following stock options were outstanding at the end of the respective years:

	Stock options	Weighted Average exercise price \$	Number of options exercisable
Balance, January 1, 2017	2,807	4.58	1,207
Granted	80	2.65	-
Forfeited	(194)	6.44	(123)
<b>Balance at December 31, 2017</b>	2,693	4.39	1,693
Expired	(852)	6.31	(852)
Surrendered	(412)	5.26	(412)
Forfeited	(115)	3.70	(74)
Exercised	(7)	1.73	(7)
<b>Balance at December 31, 2018</b>	<b>1,307</b>	<b>2.93</b>	<b>891</b>

On April 30, 2018, holders of 412 stock options with a strike price of \$5.26 voluntarily surrendered their options for cancellation. The surrender had no impact on the consolidated statement of comprehensive loss as the associated share based compensation expense had been fully recognized by the time of surrender.

As at December 31, 2018 there were 891 (December 31, 2017 – 1,693) stock options that were exercisable.

Exercise price	Number of options outstanding	Number of options exercisable	Weighted average years to expiry
\$1.33	30	10	2.0
\$1.73	7	9	2.0
\$1.75	20	-	3.8
\$1.91	467	166	2.3
\$2.03	10	7	1.7
\$2.12	591	210	2.8
\$2.85	25	-	3.3
\$3.01	35	-	3.3
\$8.00	16	16	0.3
\$12.00	106	106	0.3
	1,307	891	2.3

The Company accounts for its stock options granted to employees and officers using the fair value method. The fair value of each option granted is estimated on the date of grant using a Black-Scholes option-pricing model. Under this model, the following assumptions have been used:

	2017
Risk free rate (%)	1.0
Expected life (years)	5
Expected volatility (%)	64
Expected dividends	-
Forfeiture rate (%)	2

During the year ended December 31, 2018 \$261 (December 31, 2017 - \$207) was recorded as share based compensation expense with respect to stock options.

During the year ended December 31, 2018 \$409 (December 31, 2017 - \$568) was capitalized with respect to grants of RSU's, PSU's and stock options related to technical personnel engaged in exploration and development activities. A corresponding credit to contributed surplus was made for these amounts.

The option grants during 2017 had a weighted average fair value expense attributed to them of \$1.42.

d) Performance warrants

The performance warrants were exercisable at \$6.00 for the Series A warrants; \$7.00 for the Series B warrants; and \$8.50 or \$12.00 for the Series C warrants. Each performance warrant was convertible into one common share of Journey. The performance warrants had a vesting condition based on the "value" of Journey shares. For series A and B, one third of the performance warrants were scheduled to vest when the value of the common shares reaches \$10.00 per share; the next third at \$11.00 per share and the last third at \$12.00 per share. For series C performance warrants, one third of the performance warrants vest when the Value of the common shares reaches \$12.00 per share; the next third at \$13.00 per share and the last third at \$14.00 per share. Value is defined as the price at which any of the following occurs: a takeover bid for Journey; the Journey shares trade on a stock exchange for five consecutive days; or upon the issuance of equity pursuant to a public or private placement. All performance warrants also had a time vesting component of one-third increments annually on the anniversary date of the grant. The performance warrants all expired July 1, 2018.

The following performance warrants were outstanding at the end of the respective periods:

	Number	Weighted average exercise price \$	Weighted average fair value per warrant \$
<b>Series A</b>			
Balance at January 1, 2017	151	6.00	3.78
Forfeited	(1)	6.00	3.78
Balance at December 31, 2017	150	6.00	3.78
Forfeited	(3)	6.00	3.78
Expired	(147)	6.00	3.78
<b>Balance at December 31, 2018</b>	-	-	-

	Number	Weighted average exercise price \$	Weighted average fair value per warrant \$
<b>Series B</b>			
Balance at January 1, 2017	298	7.00	3.46
Forfeited	(2)	7.00	3.46
Balance at December 31, 2017	296	7.00	3.46
Forfeited	(7)	7.00	3.46
Expired	(289)	7.00	3.46
<b>Balance at December 31, 2018</b>	-	-	-

	Number	Weighted average exercise price \$	Weighted average fair value per warrant \$
<b>Series C</b>			
Balance at January 1, 2017	339	11.06	5.25
Forfeited	(147)	10.51	5.39
Balance at December 31, 2017	192	11.48	5.14
Expired	(192)	11.48	5.14
<b>Balance at December 31, 2018</b>	-	-	-

During the year ended December 31, 2018, nil (December 31, 2017 - \$(99)) was credited to share based compensation expense for the forfeiture of unvested warrants.

e) Share purchase warrants

Concurrent with the private placements to employees during 2012, share purchase warrants were issued on the basis of one warrant for each common share issued and have a strike price of \$6.98 per warrant. Each warrant was exercisable into one common share of Journey and had an initial expiry of July 1, 2017. During the year ended December 31, 2016, the board of directors approved an extension of the expiry of the warrants by one year to July 1, 2018. All of the warrants expired July 1, 2018.

The share purchase warrants outstanding at the respective year-ends were as follows:

	Issued	Weighted average exercise price \$	Weighted average fair value per warrant \$
<b>Balance at January 1 and December 31, 2017</b>	975	6.98	2.16
Expired	975	6.98	2.16
<b>Balance at December 31, 2018</b>	-	-	-

(f) Employee Share Ownership Plan (“ESOP”)

The ESOP plan provides for contributions by Journey of two times the amount an employee contributes to a maximum of 5% of their base salary. Both the employee and the employer contributions are combined and used to purchase Journey shares in the public market. The Company contributions are expensed under general and administrative expense.

**15. FINANCE EXPENSE**

Finance expense is comprised of the following:

	2018	2017
Interest and bank charges	<b>8,515</b>	5,677
Finance income	<b>(2)</b>	(32)
Accretion on decommissioning liabilities	<b>3,919</b>	3,721
Accretion on Promissory Notes	<b>769</b>	447
Finance expense	<b>13,201</b>	9,813

**16. DEFERRED INCOME TAXES**

The provision for deferred income tax reflects an effective rate, which differs from the expected, statutory, federal and provincial income tax rates. Differences between the statutory rate and the effective rate for the years ended December 31, 2018 and 2017 are reconciled as follows:

	2018	2017
Net loss before taxes	<b>(18,443)</b>	(38,383)
Expected income tax recovery at the statutory rate of 27.0% (2017 – 27.0%)	<b>(4,980)</b>	(10,363)
Increase (decrease) in income taxes resulting from:		
Non-deductible accretion and other	<b>216</b>	127
Share based compensation expense	<b>804</b>	424
Changes in expected tax basis	-	(220)
Flow-through share expense	-	555
De-recognition of previously recognized deferred tax asset	<b>22,964</b>	104,115
	<b>19,004</b>	94,638

The components of the net deferred tax assets are as follows:

	2018	2017
PP&E and E&E assets	(54,586)	(24,142)
Decommissioning obligations	49,074	47,359
Fair value of financial instruments	(252)	662
Share issue costs	(1)	592
Debt issue costs	119	158
Non-capital losses	18,845	7,574
<b>Net deferred tax asset</b>	<b>13,199</b>	<b>32,203</b>

During 2018, the Company de-recognized deferred tax assets of \$22,964 (2017 - \$104,115) in respect of deductible temporary differences due to the uncertainty that sufficient future taxable profit will be generated against which the Company can utilize the benefits of certain tax. The estimation of future taxable profit was based primarily on the projected cash flows from the reserve report prepared by Journey's independent reserve evaluators and effective December 31, 2018.

The movements in deferred income tax assets (liabilities) were as follows:

	PP&E and E&E	Decom- missioning	Tax Losses	Risk Manage ment	Share issue costs	Debt issue costs	Total
As at January 1, 2017	60,386	40,285	21,356	3,519	1,185	159	126,890
Recognized in income	(84,528)	7,074	(13,782)	(2,857)	(595)	(1)	(94,689)
Recognized in equity	-	-	-	-	2	-	2
As at December 31, 2017	(24,142)	47,359	7,574	662	592	158	32,203
Recognized in income	(30,444)	1,716	11,271	(914)	(593)	(40)	(19,004)
<b>As at December 31, 2018</b>	<b>(54,586)</b>	<b>49,075</b>	<b>18,845</b>	<b>(252)</b>	<b>(1)</b>	<b>118</b>	<b>13,199</b>

The amount of tax pools available at the respective year-ends, net of those tax pools associated with the deferred tax asset that were de-recognized, were as follows:

	December 31, 2018	December 31, 2017
Oil and gas expenditures	151,305	265,912
Tax losses	69,817	28,071
Financing costs and other	445	2,835
	<b>221,567</b>	<b>296,818</b>

The non-capital losses expire at various times between 2027 and 2032.

## 17. PER SHARE AMOUNTS

The following table summarizes the weighted average common shares used in calculating loss per share:

	2018	2017
Net loss and comprehensive loss	(37,447)	(133,021)
Weighted average shares outstanding - basic	39,819	49,390
Weighted average shares outstanding - diluted	39,819	49,390
Net (loss) income per share – basic	(0.94)	(2.69)
Net (loss) income per share – diluted	(0.94)	(2.69)

The basic net loss per share is calculated by dividing the net loss attributable to the shareholders of the Company by the weighted average number of common shares outstanding for the period. Excluded from the diluted number of shares for the period ended December 31, 2018 is the effect of 3,696 (December 31, 2017 – 3,385) stock options, RSU's and PSU's as to include them would be anti-dilutive.

## 18. FINANCIAL INSTRUMENTS

### (a) Fair Value

Journey designates its financial instruments into one of the following three categories: 1) fair value through profit and loss ("FVTPL"), 2) financial assets at amortized cost, and 3) financial liabilities at amortized cost.

Journey has elected to designate its financial instruments as follows:

	December 31, 2018		December 31, 2017	
	Carrying value	Estimated fair value	Carrying value	Estimated fair value
<b>Cash</b>	-	-	8,227	8,227
<b>Amortized cost</b>				
Accounts receivable	9,220	9,220	16,111	16,111
Accounts payable and accrued liabilities	(16,878)	(16,878)	(28,290)	(28,290)
Promissory Notes	(49,436)	(52,000)	(28,398)	(30,000)
Bank debt and bank indebtedness - principal	(76,509)	(76,509)	(70,000)	(70,000)
<b>Fair value through profit and loss</b>				
Derivative contracts – current asset	1,229	1,229	2,308	2,308
Derivative contracts – current liability	-	-	(4,449)	(4,449)
Derivative contracts – non-current liability	-	-	(16)	(16)

Journey's financial instruments recognized in the Consolidated Statement of Financial Position consist of cash, accounts receivable, accounts payable, bank debt, promissory notes and derivative contracts. The carrying value of the accounts receivable, accounts payable and accrued liabilities approximates their fair value at December 31, 2018 due to their short-term nature. The fair value of bank debt is based upon level 2 inputs. The fair value of the bank debt approximates the carrying value as the debt carries a floating interest rate that approximates a market rate of interest. The fair value of the promissory notes is based on level 2 inputs, being Journey's estimated credit adjusted rate of interest.

The fair value of a financial instrument is the amount of consideration that would be agreed upon in an arm's length transaction between knowledgeable, willing parties who are under no compulsion to act. Journey characterizes inputs used in determining fair value using a hierarchy that prioritizes inputs depending on the degree to which they are observable.

The fair value of Journey's commodity contracts are based upon Level 2 inputs, having been provided by the financial intermediary with whom the transactions were completed and tested by management for reasonableness based on current prices and market data. The fair value of financial derivatives are recurring measurements and are determined using third-party models and valuation methodologies that utilize observable market data, including forward commodity prices and interest rates to estimate the current fair value of financial derivatives

### (b) Derivative contracts

Journey entered into the following financial derivative transactions to mitigate its exposure to fluctuations in commodity prices.

Oil contracts	Volume bbls/d	Pricing point	Strike price per bbl	Term	Fair value
Call	1,500	WTI NYMEX	USD\$73.00	January 1, 2019 to June 30, 2019	39
Collar	500	WTI NYMEX	CDN\$77.00-84.15	July 1, 2019 to December 31, 2019	1,190
<b>Total oil derivative contracts fair value - asset</b>					<b>1,229</b>

The net change in these contracts resulted in a realized net loss of \$11,693 and an unrealized net gain of \$3,386 for the period ended December 31, 2018.

A 10% increase or decrease in the respective commodity prices would have impacted the comprehensive loss by the following amounts at December 31, 2018:

<b>Commodity</b>	<b>10% increase</b>	<b>10% decrease</b>
Oil	(158)	80

The (gain) loss on derivative contracts for the years ended December 31, 2018 and 2017 were as follows:

	<b>2018</b>	<b>2017</b>
Realized	<b>11,693</b>	(1,420)
Unrealized	<b>(3,386)</b>	(10,581)
	<b>8,307</b>	(12,001)

**(c) Risks**

(i) Credit risk

A substantial portion of Journey's accounts receivable is with oil and gas marketing entities. Receivables from these marketers are normally collected on the 25<sup>th</sup> day of the month following calendar month in which production has occurred. Journey has not experienced any material collection issues with its petroleum and natural gas marketers. Journey generally extends unsecured credit to these companies; therefore, the collection of accounts receivable may be affected by changes in economic or other conditions and may accordingly impact Journey's overall credit risk. Management believes the risk is mitigated by the size, reputation and diversified nature of the companies to which it extends credit.

Journey is exposed to losses in the event of non-performance by counterparties to financial risk management contracts. Journey minimizes credit risk associated with possible non-performance of these financial instruments by entering into contracts with only investment grade counterparties, limiting exposure to any one counterparty and monitoring procedures around extending credit. Journey is managing this risk within its credit limit guidelines and procedures. While Management believes Journey's credit limit guidelines and procedures are sufficient to address credit risk, they are still subject to the volatility of the general financial credit environment. Journey's maximum credit risk is its entire receivable accounts and derivative contracts.

	<b>2018</b>	<b>2017</b>
Accounts receivable	<b>9,220</b>	16,111
Derivative contracts	<b>1,229</b>	2,308
	<b>10,449</b>	18,419

Management has determined the provision for uncollectable accounts as at December 31, 2018 to be \$609 (2017 - \$465). Accounts receivable balances with third parties in excess of 90 days are \$1,654 (2017 - \$1,254).

The continuity of the Company's reserve for doubtful accounts for the years ended December 31 is as follows:

	2018	2017
Allowance for doubtful accounts as at January 1	465	283
Amounts recovered (written off)	(55)	5
Provision adjustment	199	177
Allowance for doubtful accounts as at December 31	609	465

(ii) Interest rate risk

Borrowings under bank credit facilities are market-rate based (variable interest rates); thus exposing Journey to cash flow risk. A 1% change in interest rates, using balances at year-end would result in a \$559 change to comprehensive loss (2017 - \$451).

(iii) Foreign exchange risk

The Company is exposed to the risk of changes in the Canadian/U.S. dollar exchange rate on sales of commodities that are directly correlated to U.S. dollar benchmark prices and derivative contracts denominated in U.S. dollars.

(iv) Liquidity risk

Journey is exposed to liquidity risk, which is the risk the entity may not be able to generate or obtain sufficient cash resources to meet its commitments as they become due. Journey mitigates this risk by management of cash and debt. Journey maintains short-term and long-term cash forecasting based on estimated production levels and estimated pricing in order to proactively enact changes to our capital spending to maintain a reasonable working capital balance. Prior to maturity of the facility on April 30, 2019, the Company will need to complete its discussions with the syndicate to renew or extend the facility. The syndicate of lenders could change the capacity of the Company's credit facility at the upcoming renewal and the impact to the organization could be material. The current available capacity on the Company's credit facility is currently assessed by Management to be sufficient to ensure all obligations will be met as they come due.

The following table details Journey's financial liabilities as at December 31, 2018:

	< 1year	1-2 years	> 2 years	Total
Accounts payable and accrued liabilities	16,878	-	-	16,878
Bank debt and bank indebtedness	1,009	75,500	-	76,509
Promissory Notes	-	30,000	22,000	52,000
Interest on bank debt and bank indebtedness	34	5,104	-	5,138
Interest on promissory note	3,978	3,601	2,942	10,521
	<b>21,899</b>	<b>114,205</b>	<b>24,942</b>	<b>161,046</b>

The following table details Journey's financial liabilities as at December 31, 2017:

	< 1year	1-2 years	> 2 years	Total
Accounts payable and accrued liabilities	28,290	-	-	28,290
Derivative liabilities	4,449	16	-	4,465
Bank debt	-	70,000	-	70,000
Promissory Notes	-	-	30,000	30,000
Interest on bank debt and bank indebtedness	-	3,238	-	3,238
Interest on promissory note	2,295	2,295	1,918	6,508
	<b>35,034</b>	<b>75,549</b>	<b>31,918</b>	<b>142,501</b>

**19. SUPPLEMENTAL CASH FLOW INFORMATION**

*a) Changes in non-cash working capital*

	<b>2018</b>	2017
Accounts receivable	<b>6,892</b>	(2,056)
Prepaid expenses and deposits	<b>(540)</b>	295
Deferred financing charges	<b>8</b>	(80)
Deferred lease obligation	<b>(62)</b>	(62)
Accounts payable and accrued liabilities	<b>(11,412)</b>	7,034
	<b>(5,114)</b>	5,131
 <u>Relating to:</u>		
Operating activities	<b>(1,396)</b>	7,127
Financing activities	<b>8</b>	(80)
Investing activities	<b>(3,726)</b>	(1,916)
	<b>(5,114)</b>	5,131

*b) Supplementary cash flow information*

	<b>2018</b>	2017
Interest paid	<b>4,577</b>	4,186

*c) Sales by product type*

	<b>2018</b>	2017
Crude oil	<b>84,754</b>	77,680
Natural gas	<b>20,521</b>	24,268
Natural gas liquids	<b>9,766</b>	8,137
Petroleum and natural gas sales	<b>115,041</b>	110,085

Revenue from the sale of crude oil, natural gas and natural gas liquids is recognized based on the specified parameters in the relevant contracts with marketers and third parties. Revenue is recognized when the control of the product is transferred to the counterparty pursuant to the contract. All contracts are examined to determine if Journey acts as an agent on behalf of a third party. If this is the case revenue is recognized on a net basis realized by the Company.

*d) Employee compensation costs*

Journey's Statement of Comprehensive Loss is prepared primarily by nature of expense, with the exception of employee compensation costs, which are included in property, plant, and equipment, share-based compensation and general and administrative expenses.

The following table details the amount of total employee compensation costs included in property, plant and equipment, share-based compensation and general and administrative expenses:

	<b>2018</b>	2017
Capital	<b>1,680</b>	<b>1,749</b>
General and administrative	<b>7,144</b>	<b>7,010</b>
Share based compensation	<b>2,460</b>	<b>2,164</b>
Total employee compensation costs	<b>11,284</b>	<b>10,923</b>

## 20. RELATED PARTY TRANSACTIONS

Journey had the following related party transactions during the year:

- (a) The Company considers its directors and executives to be key management personnel. Compensation for these individuals is comprised of the following:

	2018	2017
Salaries and wages	1,249	1,229
Short-term employee benefits	575	560
Share based payments (i)	1,025	1,348
	<b>2,849</b>	<b>3,137</b>

- (i) These amounts represent the amortization of share-based compensation associated with the Company's share based compensation plans.
- (ii) As at December 31, 2018 there were nine (2017 – eleven) individuals that were considered key management personnel.
- (iii) At December 31, 2018 there is a \$2,185 commitment (2017 - \$2,614) relating to a change of control or termination of employment for key management personnel.
- (b) Through the normal course of business operations Journey uses the services of Questor Technology ("Questor"). Questor is considered a related party as the presidents of each company are related. During the year ended December 31, 2018 Journey paid Questor \$74 (2017 – \$nil).

The related party transactions above were recorded at the above disclosed exchange amounts. Management believes the amount agreed upon between the parties is reflective of comparable fair market value transactions.

## 21. COMMITMENTS AND CONTINGENCIES

In addition to the commitments listed below, the Company has various indemnifications in place in the ordinary course of business, none of which, as assessed by management, are expected to have a significant impact on the Company's Consolidated Financial Statements.

### (a) *Transportation and office lease costs*

The Company has committed to firm-service contracts for transporting natural gas. In addition, the Company has committed to future minimum payments under an operating lease that covers the rental of office space and a proportionate share of operating costs. The amounts in the table below are the minimum cash obligations that the Company must pay under the terms of the contracts.

	Total	2019	2020-2021	2022-2023	Thereafter
Natural gas transportation	1,217	756	430	31	-
Operating leases	9,863	1,969	3,825	3,756	313
Total	<b>11,080</b>	<b>2,725</b>	<b>4,255</b>	<b>3,787</b>	<b>313</b>

### (b) *Indemnifications*

Under the terms of certain agreements and the Company's by-laws Journey indemnifies individuals who have acted at the Company's request to be a director and/or officer, to the extent permitted by law, against any and all damages, liabilities, costs, charges or expenses suffered by or incurred by the individual as a result of their service. The Company currently has no outstanding claims having a potentially material adverse effect on the Company as a whole.

## **22. PRIOR YEAR COMPARATIVE NUMBERS**

Processing and other income, previously netted with operating expenses in 2017, has been reclassified to the revenue section of the Financials Statement to conform to the current disclosure in 2018.

## **23. CAPITAL MANAGEMENT**

Journey's capital structure is comprised of share capital, bank debt, promissory notes and working capital (current assets less current liabilities, but excluding the fair value of derivative contracts and decommissioning liabilities). The Company's key objectives when managing its capital structure are to: 1) meet its financial obligations as they come due; 2) finance its internally generated capital program; and 3) maintain financial flexibility to take advantage of accretive acquisitions that arise from time to time. To accomplish this Management strives to optimize its cost of capital while at the same time managing its leverage. To manage its capital structure Journey may issue equity or term debt, adjust discretionary capital spending, use its credit facility to execute its capital program, or dispose of non-core assets.

Journey continually monitors its capital structure and makes adjustments to it throughout the year as a result of drilling successes or failures, general economic conditions, the state of the petroleum industry and global events, all of which may affect commodity prices. Journey prepares an annual budget, which is approved by the Board of Directors, and is updated quarterly for acquisition and divestiture activity, changes in commodity prices, and drilling successes. The budget is intended to be flexible and is re-evaluated at each regularly scheduled board meeting to ensure the Company's finances are being managed to maximize shareholder returns.

Journey is committed to reducing bank debt and restoring the net debt to funds flow ratio to the internally desired level of approximately 2.0. While the most recent quarters' funds flow is often used as a benchmark for measuring the net debt to funds flow ratio, Journey factors in anomalies in current funds flow such as unusually low commodity prices and/or non-recurring operating costs. As at December 31, 2018, the net debt is higher than the desired level due significantly to the additional term debt of \$22,000 from January of 2018, which was used to finance the repurchase of 12,700 common shares. This additional leverage has resulted in the Company altering its planned capital expenditures for 2019 to allow the net debt to funds flow ratio to move closer to the desired level.
